

About this document:

This is a basic wireframe; proportions and positions are not final. This document details the flow and navigation of the app.

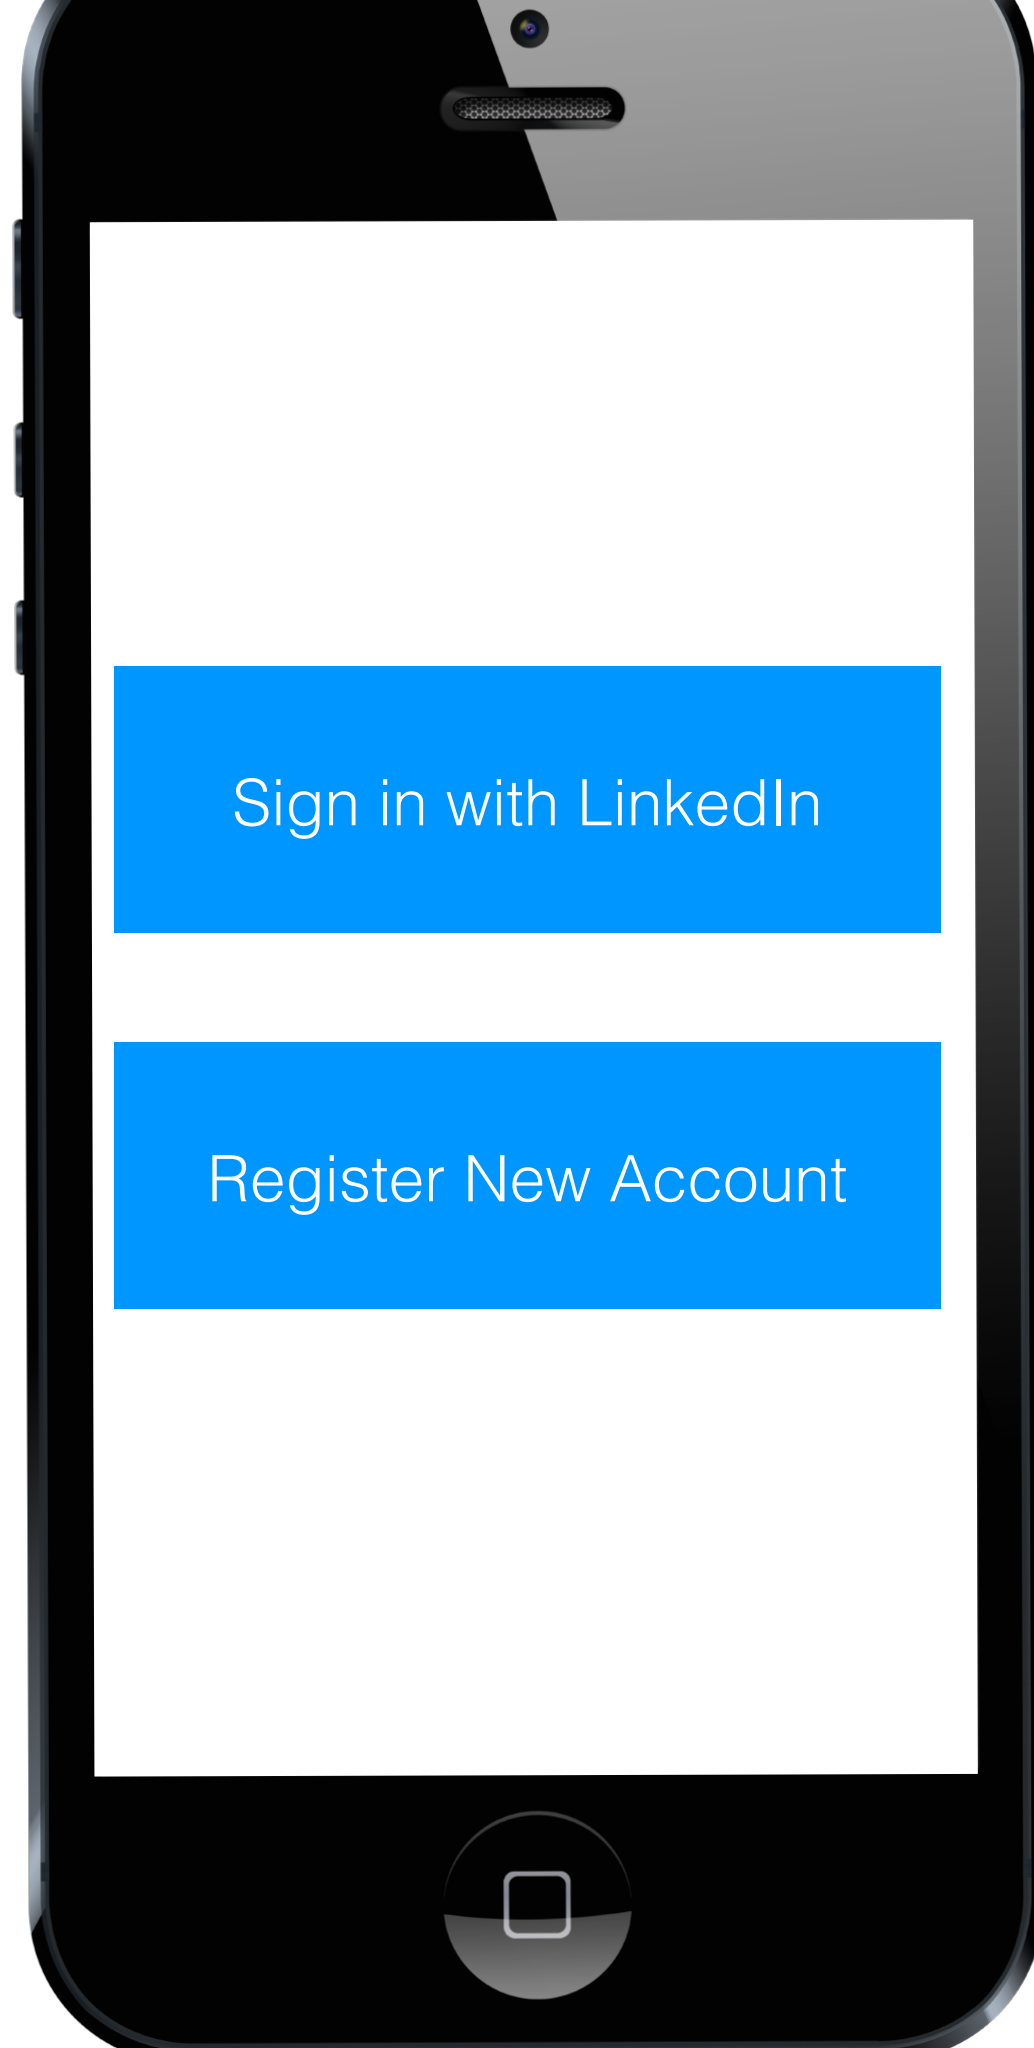

Blue **elements** represent a button, Magenta **elements** represent important data.

This document is interactive. Click or tap on a blue element to navigate to the proper location.

Login Screen

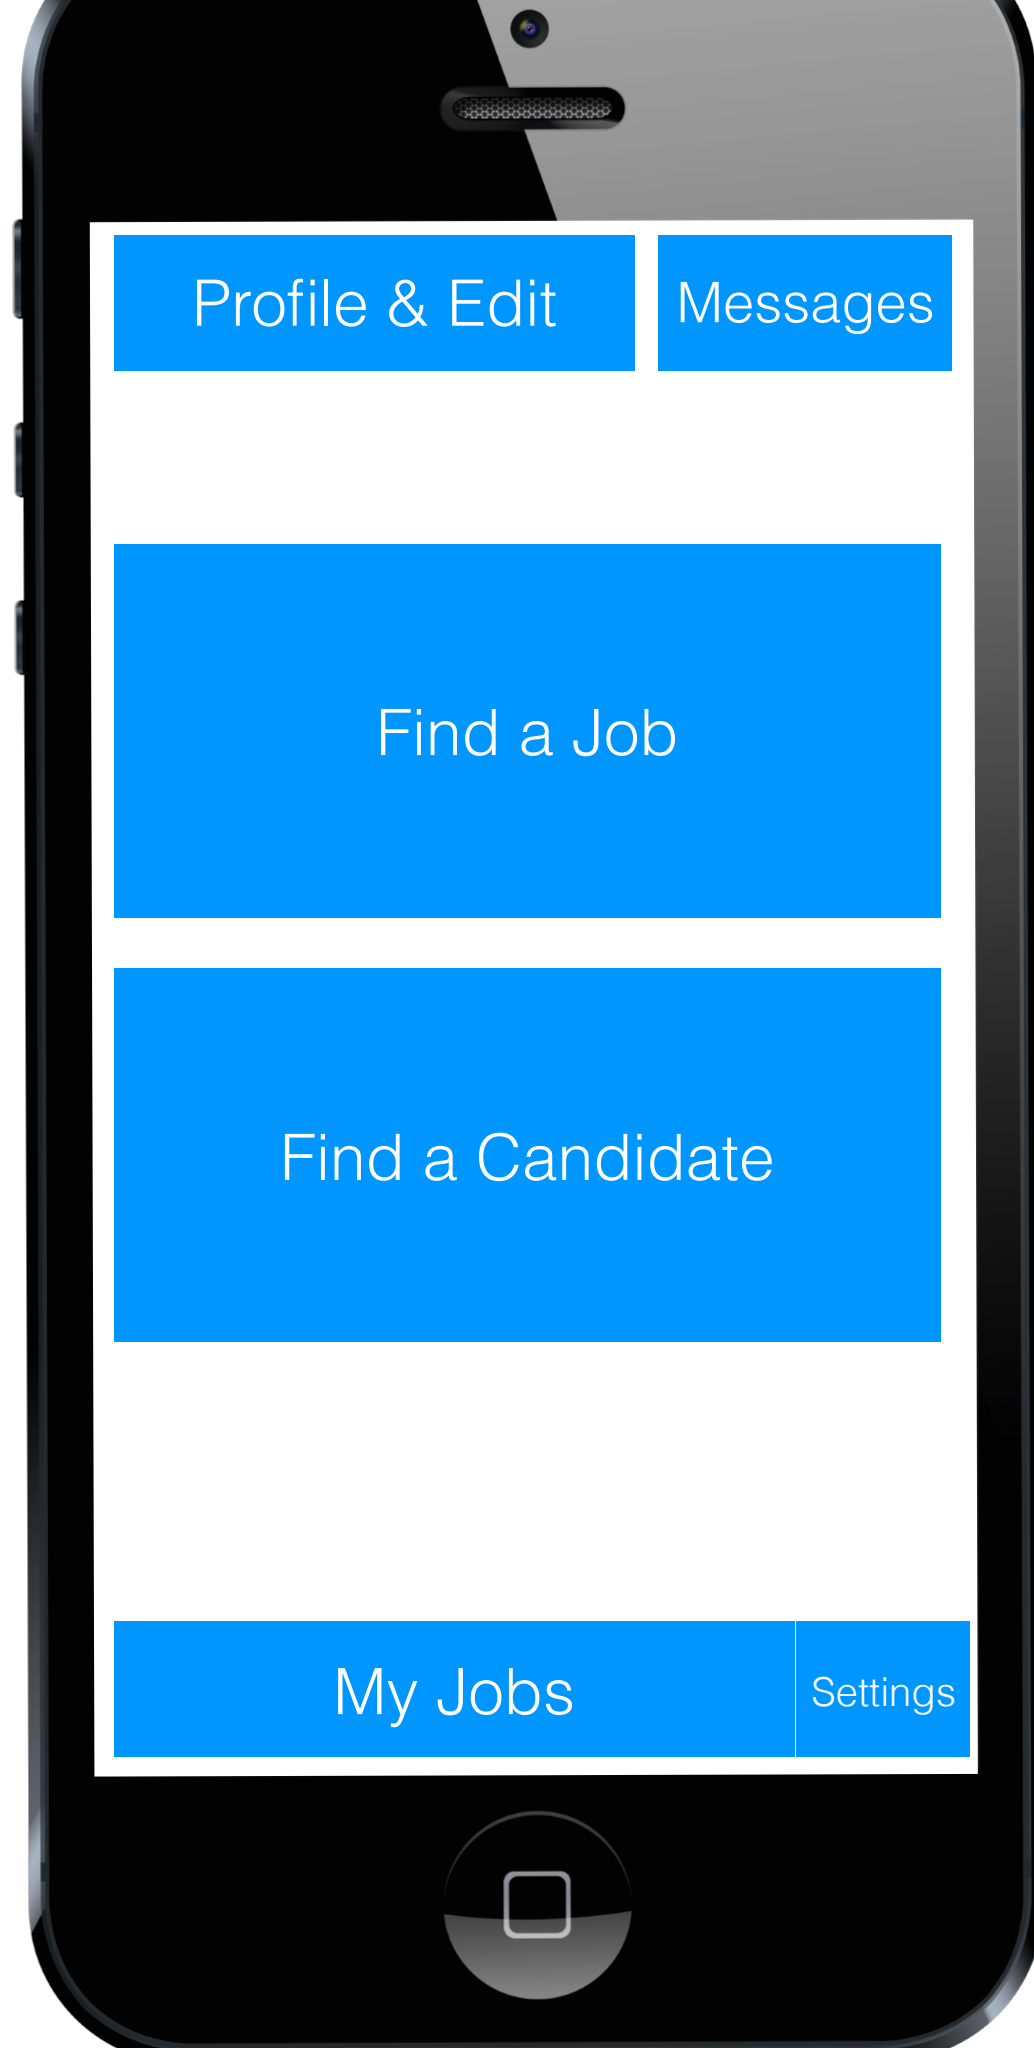

Upon first run the user is asked to Sign in with LinkedIn or Register a new account

Crowd

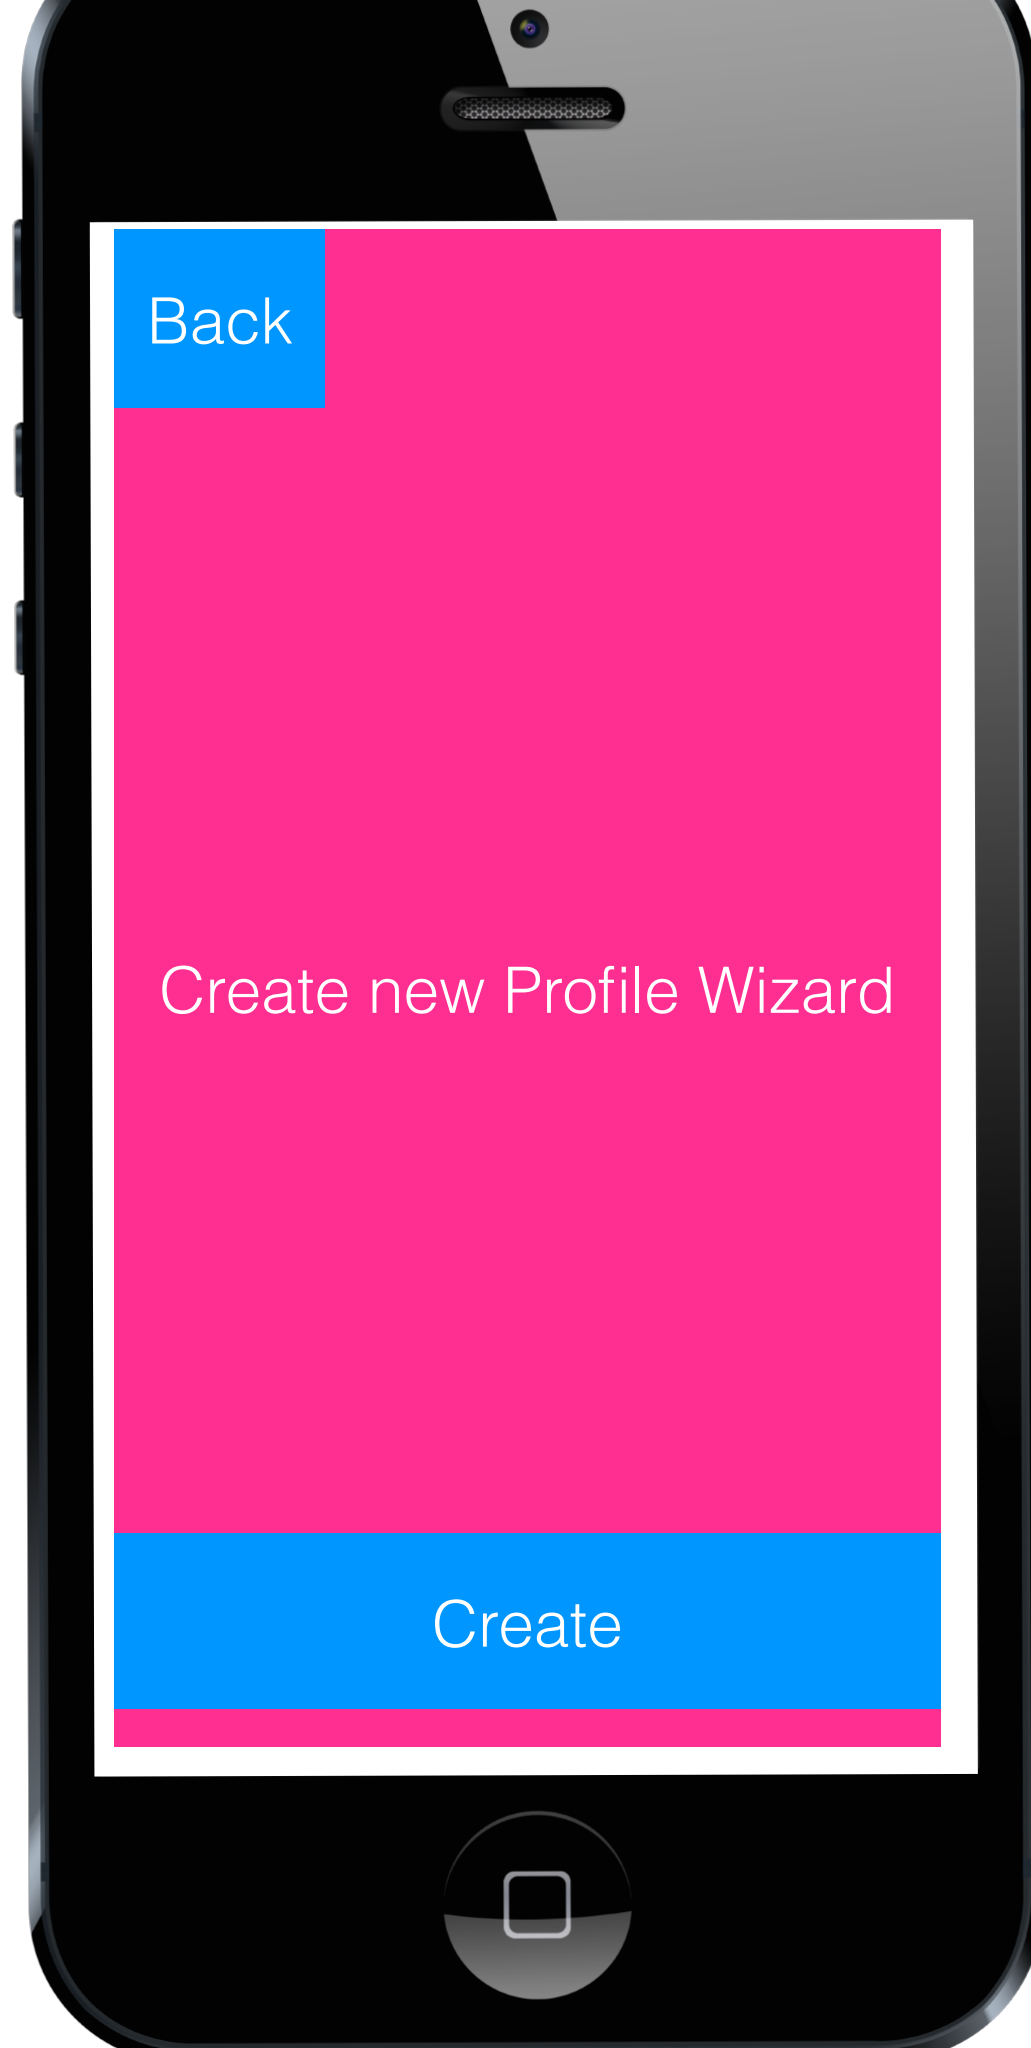

Home Screen

The Home Screen is the landing page for the user when he returns to the app. From here he can view and edit his profile, view new and old messages, find a job, find a candidate, view his jobs and access settings.

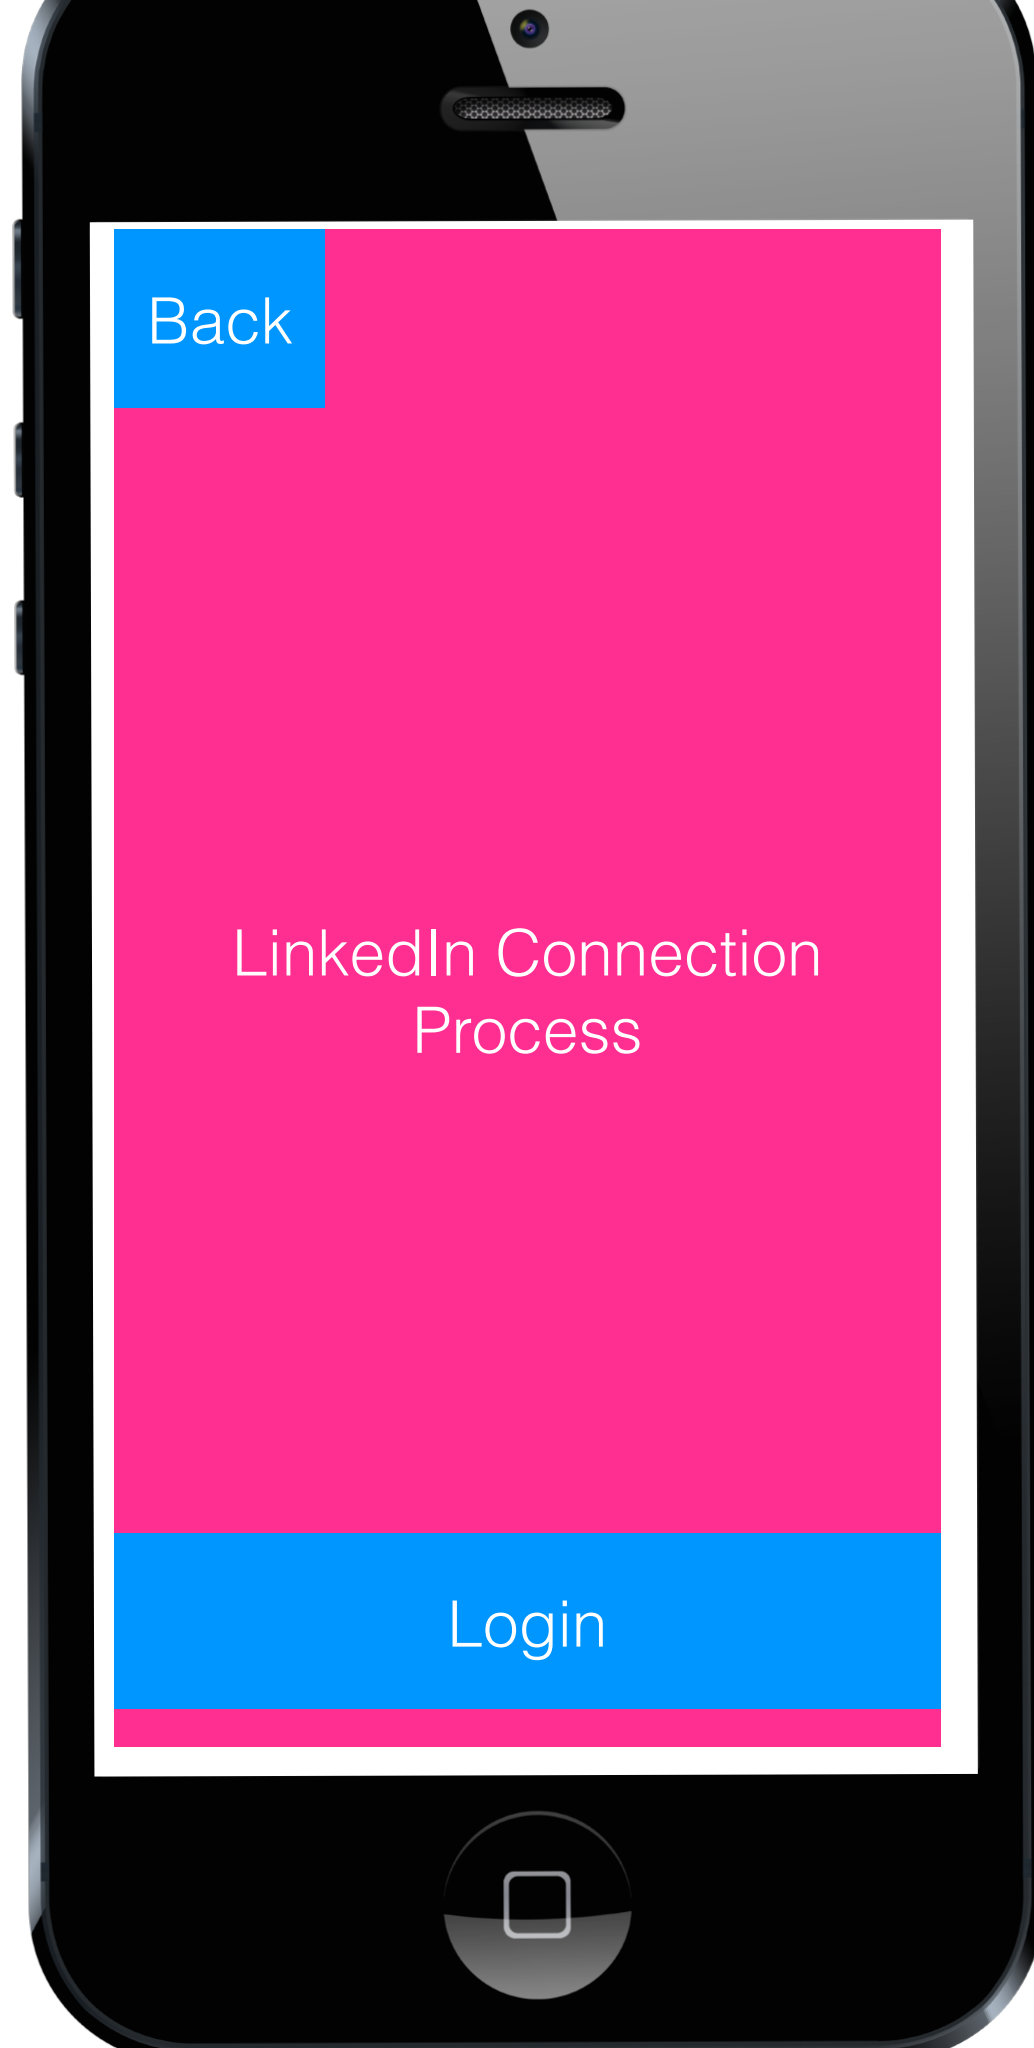

Create New Profile Wizard

This wizard will walk a user through the steps to create a profile.

Login via LinkedIn

This starts the process of
logging in via LinkedIn

Crowd

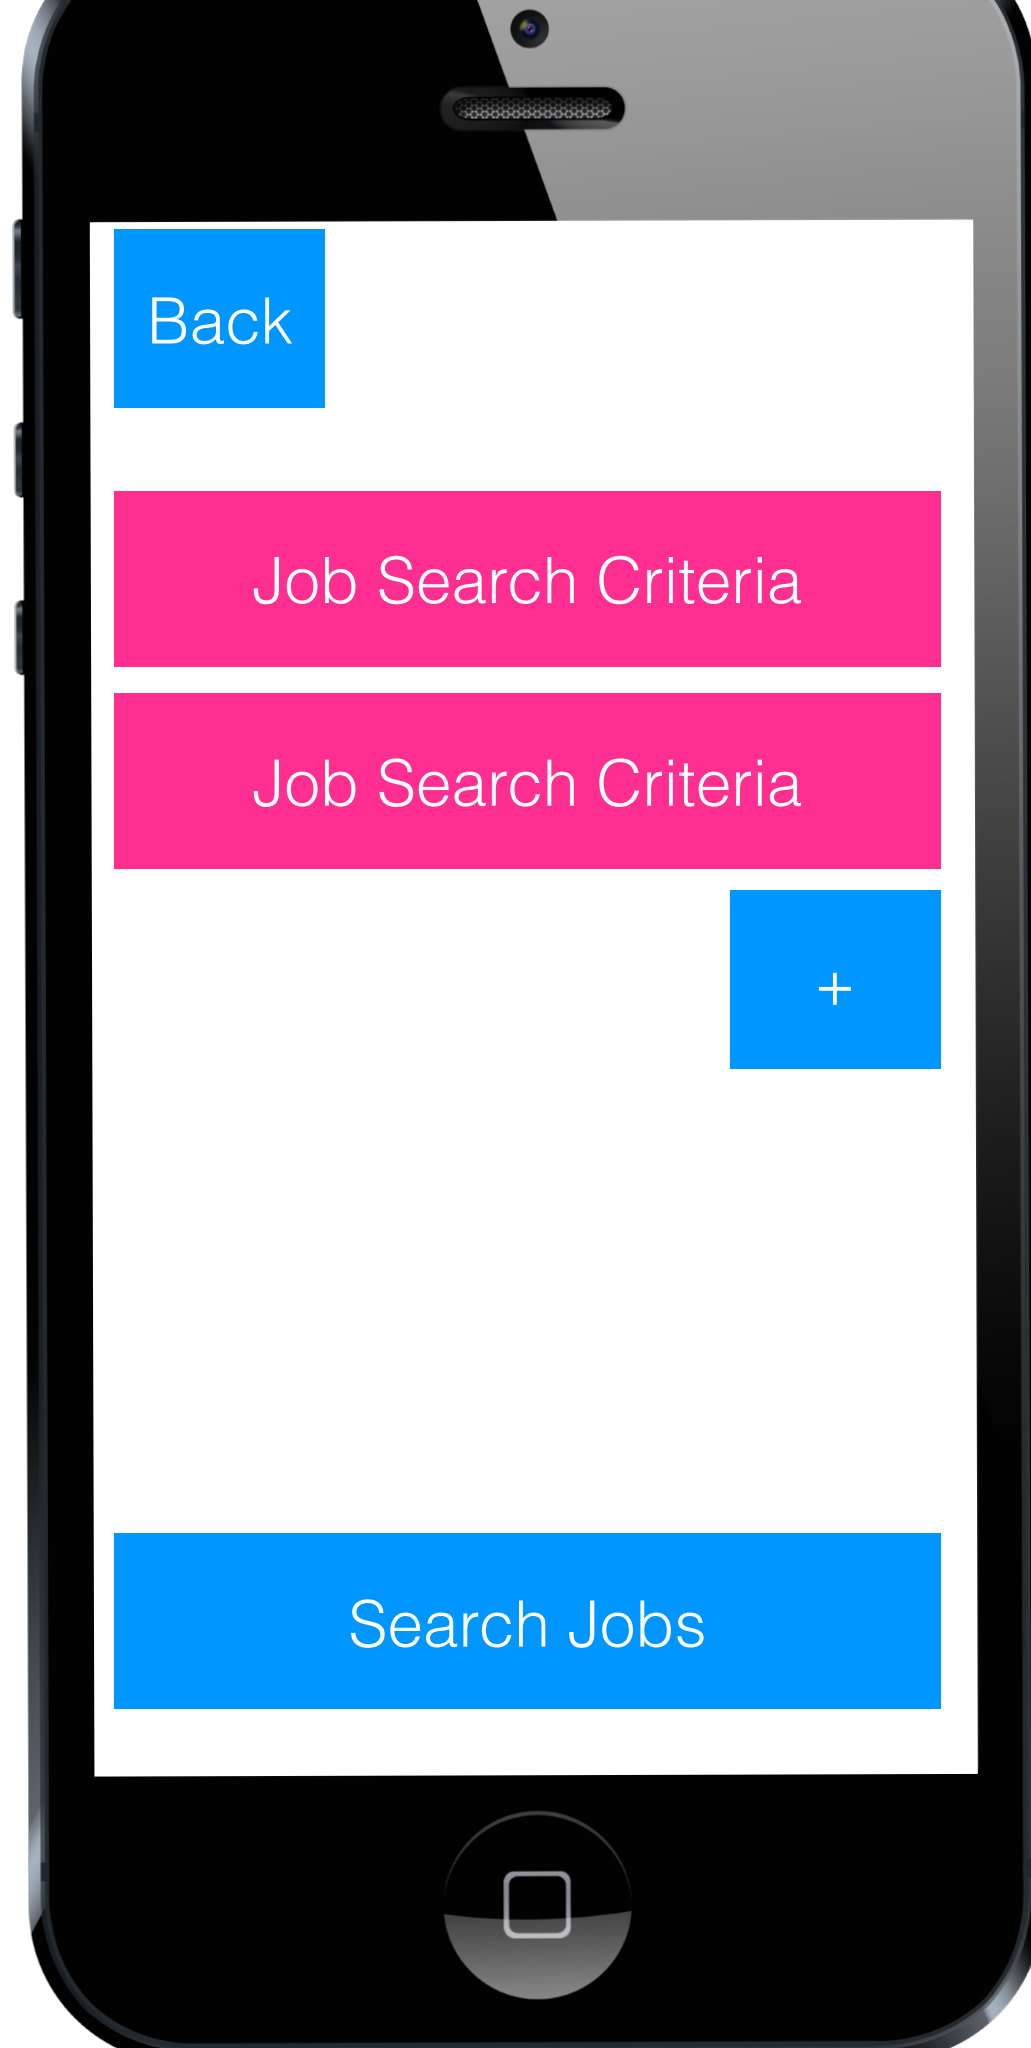

Search Jobs

Here the user can input search criteria, and add more criteria.

For example they can first search for all San Francisco jobs, then press the + button and search for all Web Design jobs.

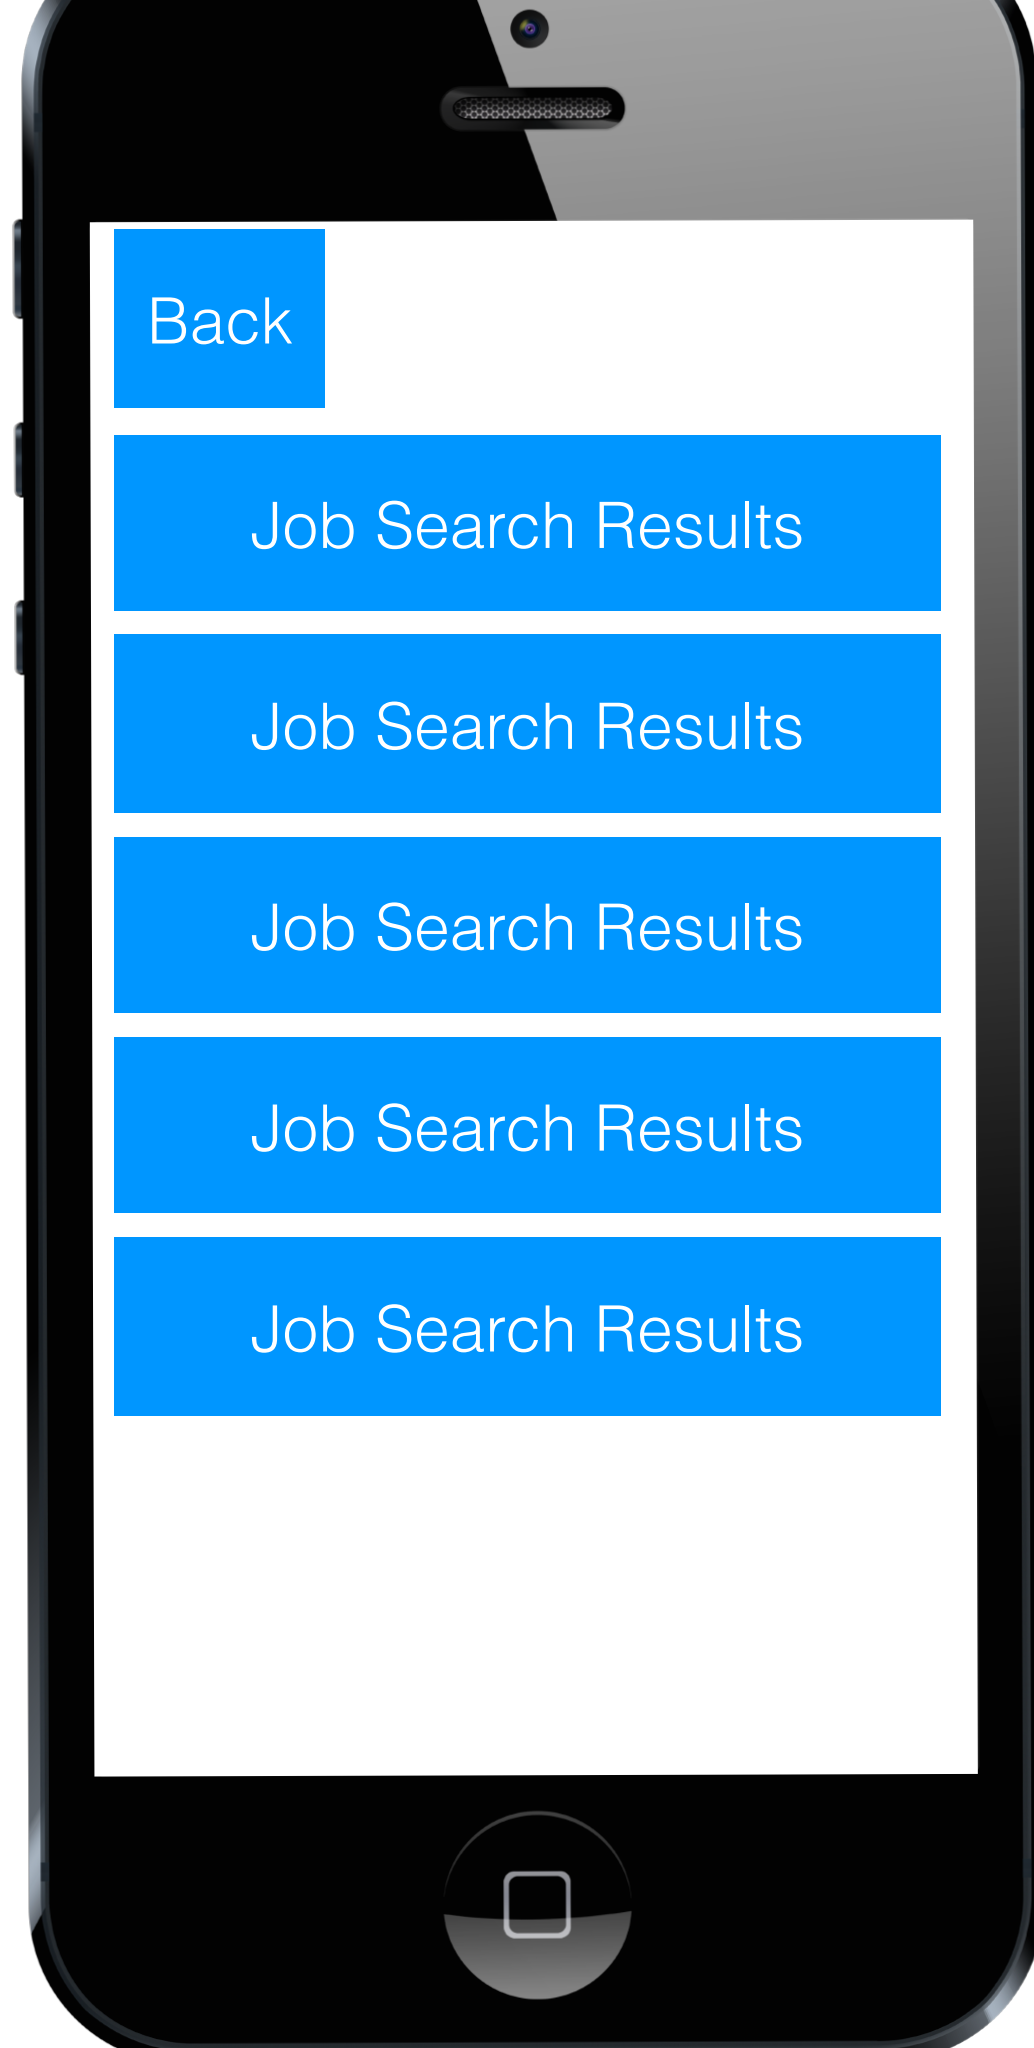

Here the user has chosen to add additional search criteria, such as a location, salary range or job category.

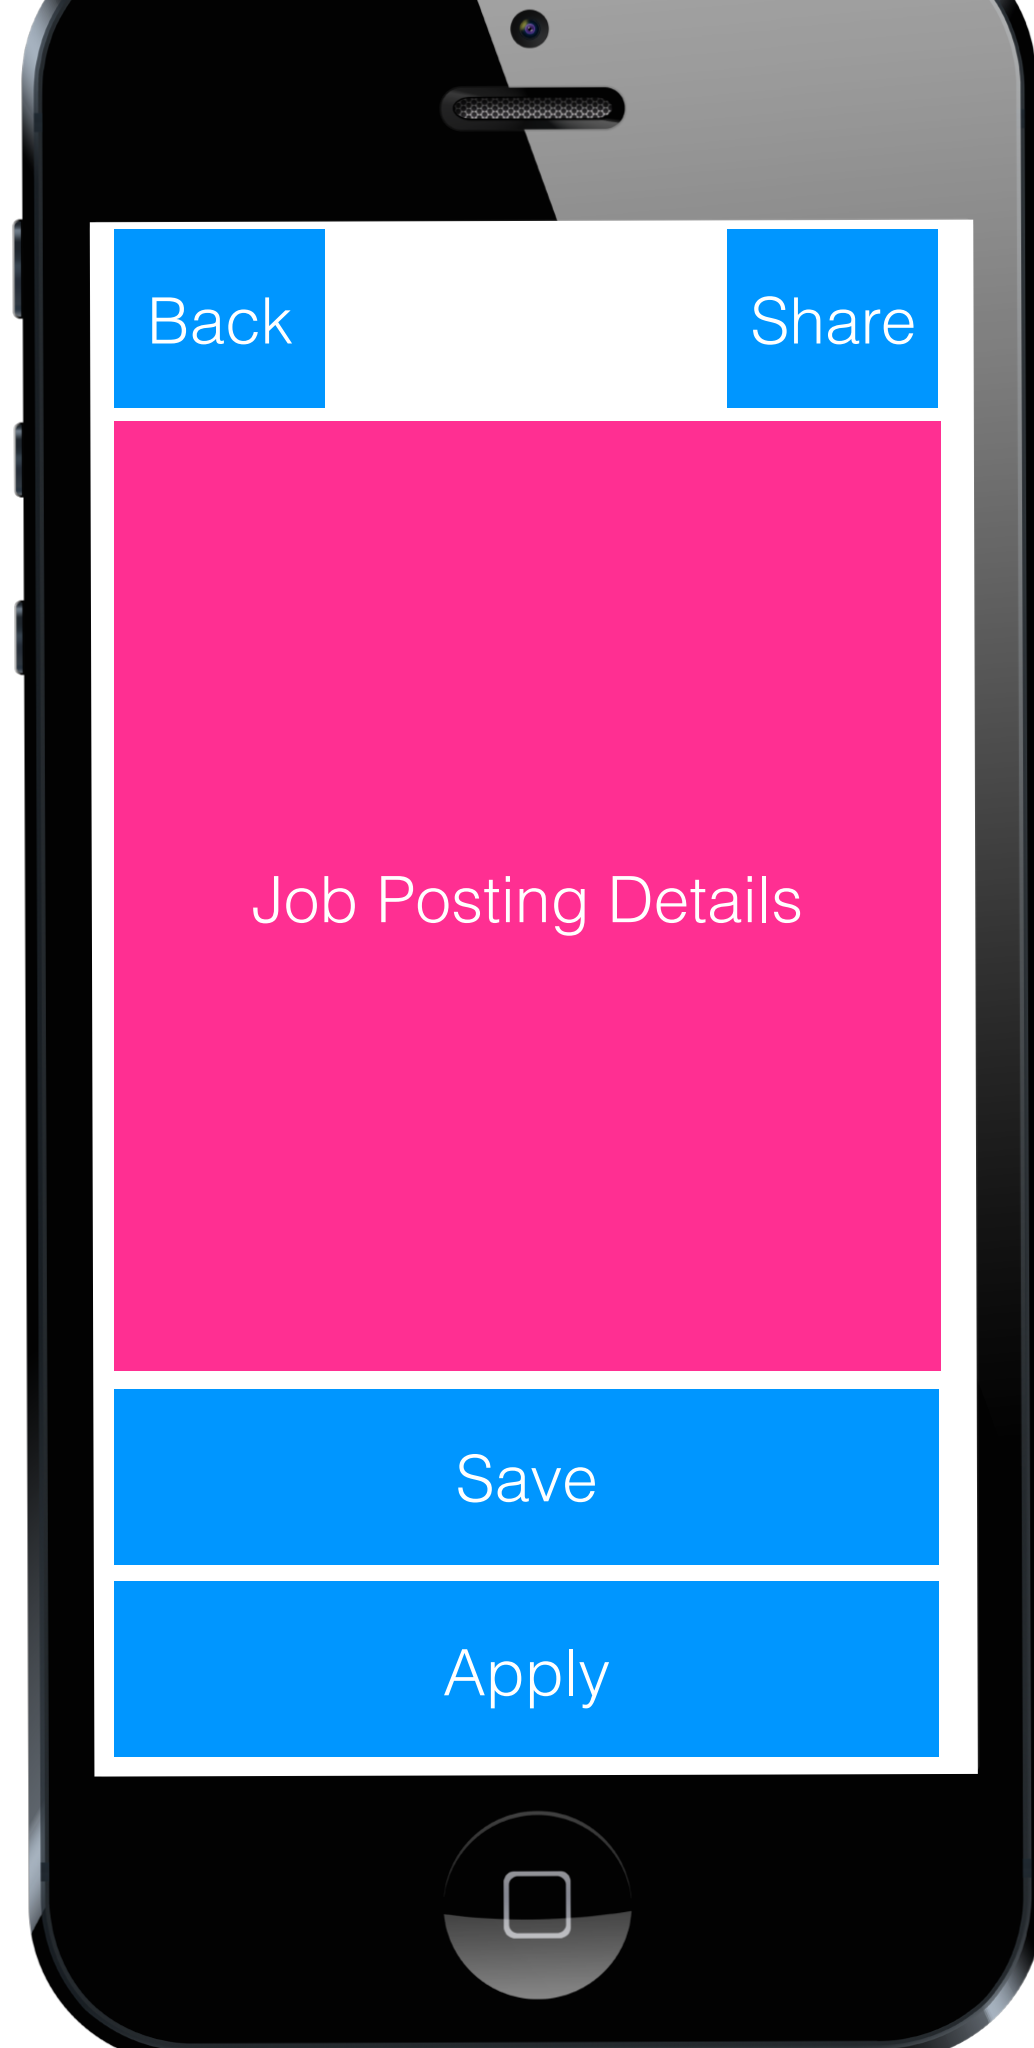

Search Results - Jobs

This list all the search results for
Job postings.

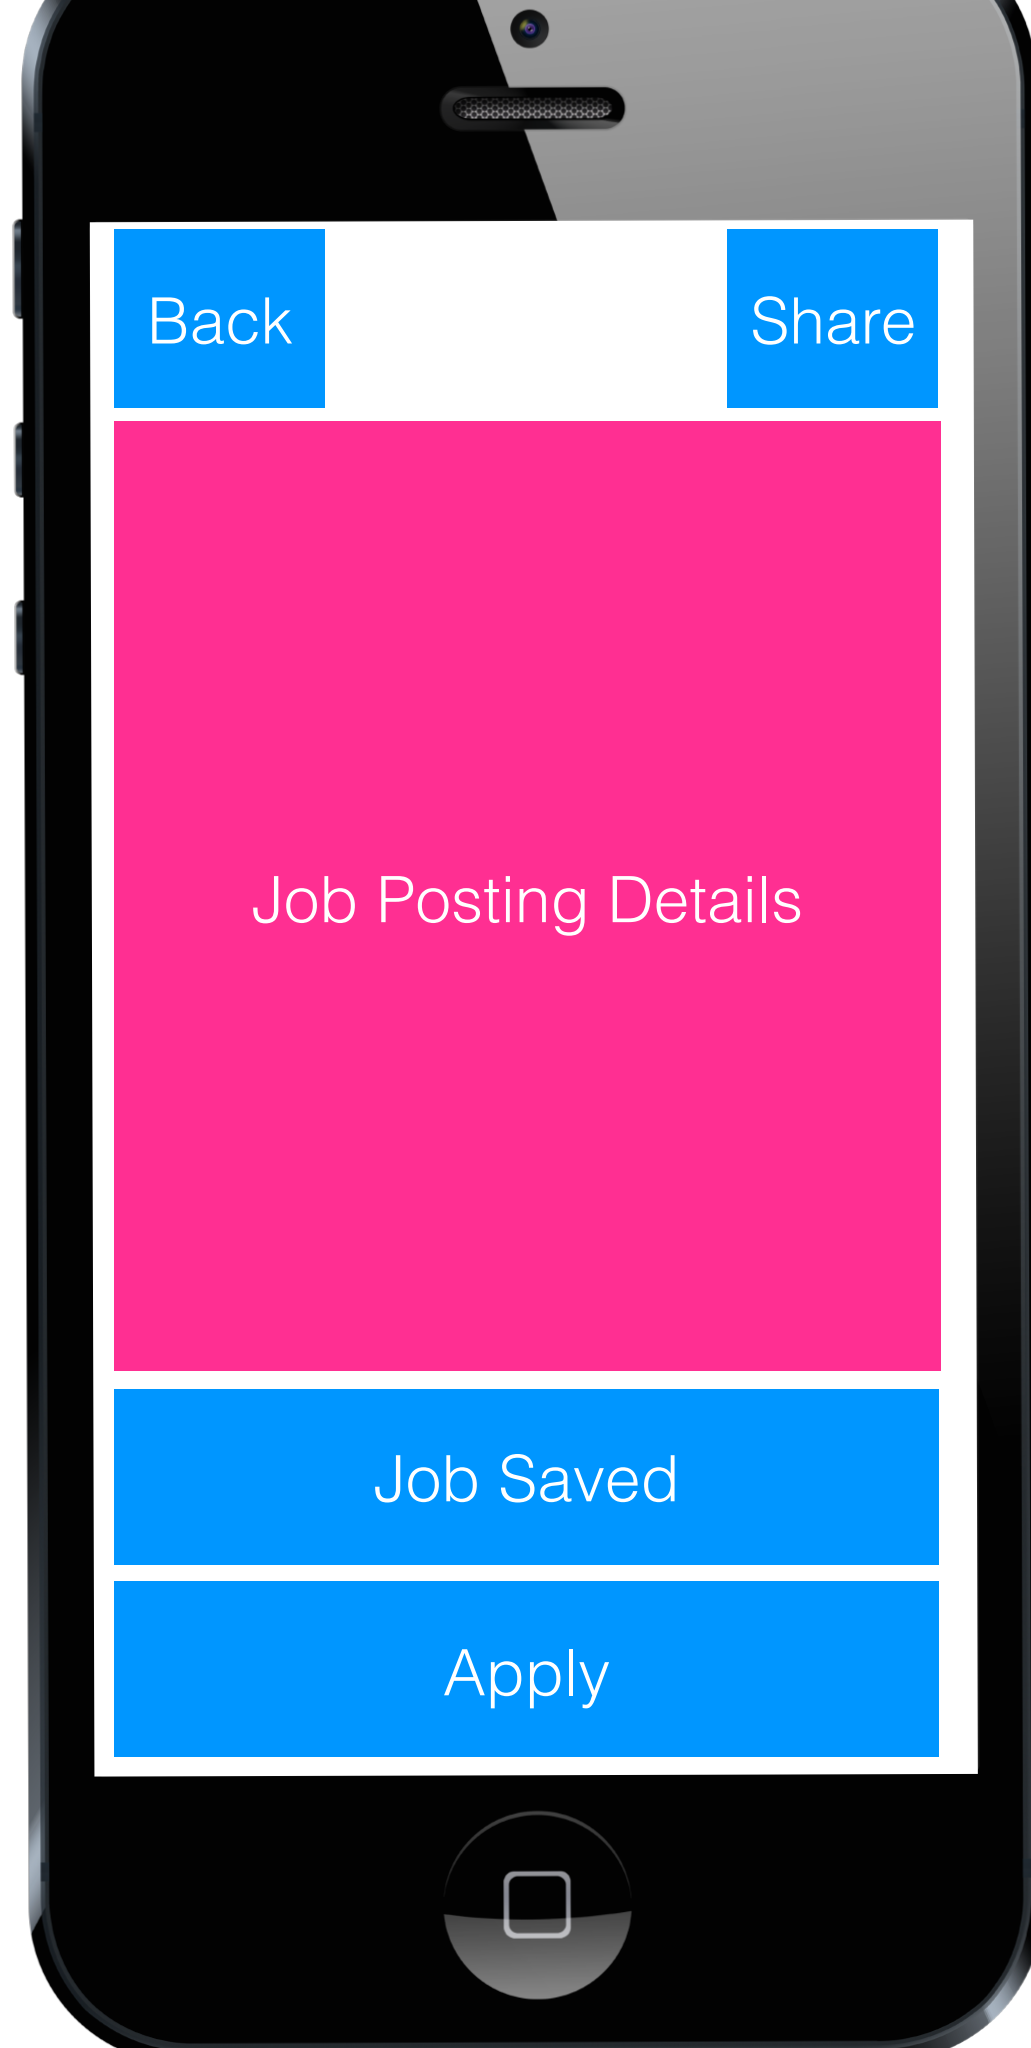

Job Posting Detail

Viewing a job posting gives details, and gives the user the choice to Share the job, Save it for later or Apply for the job.

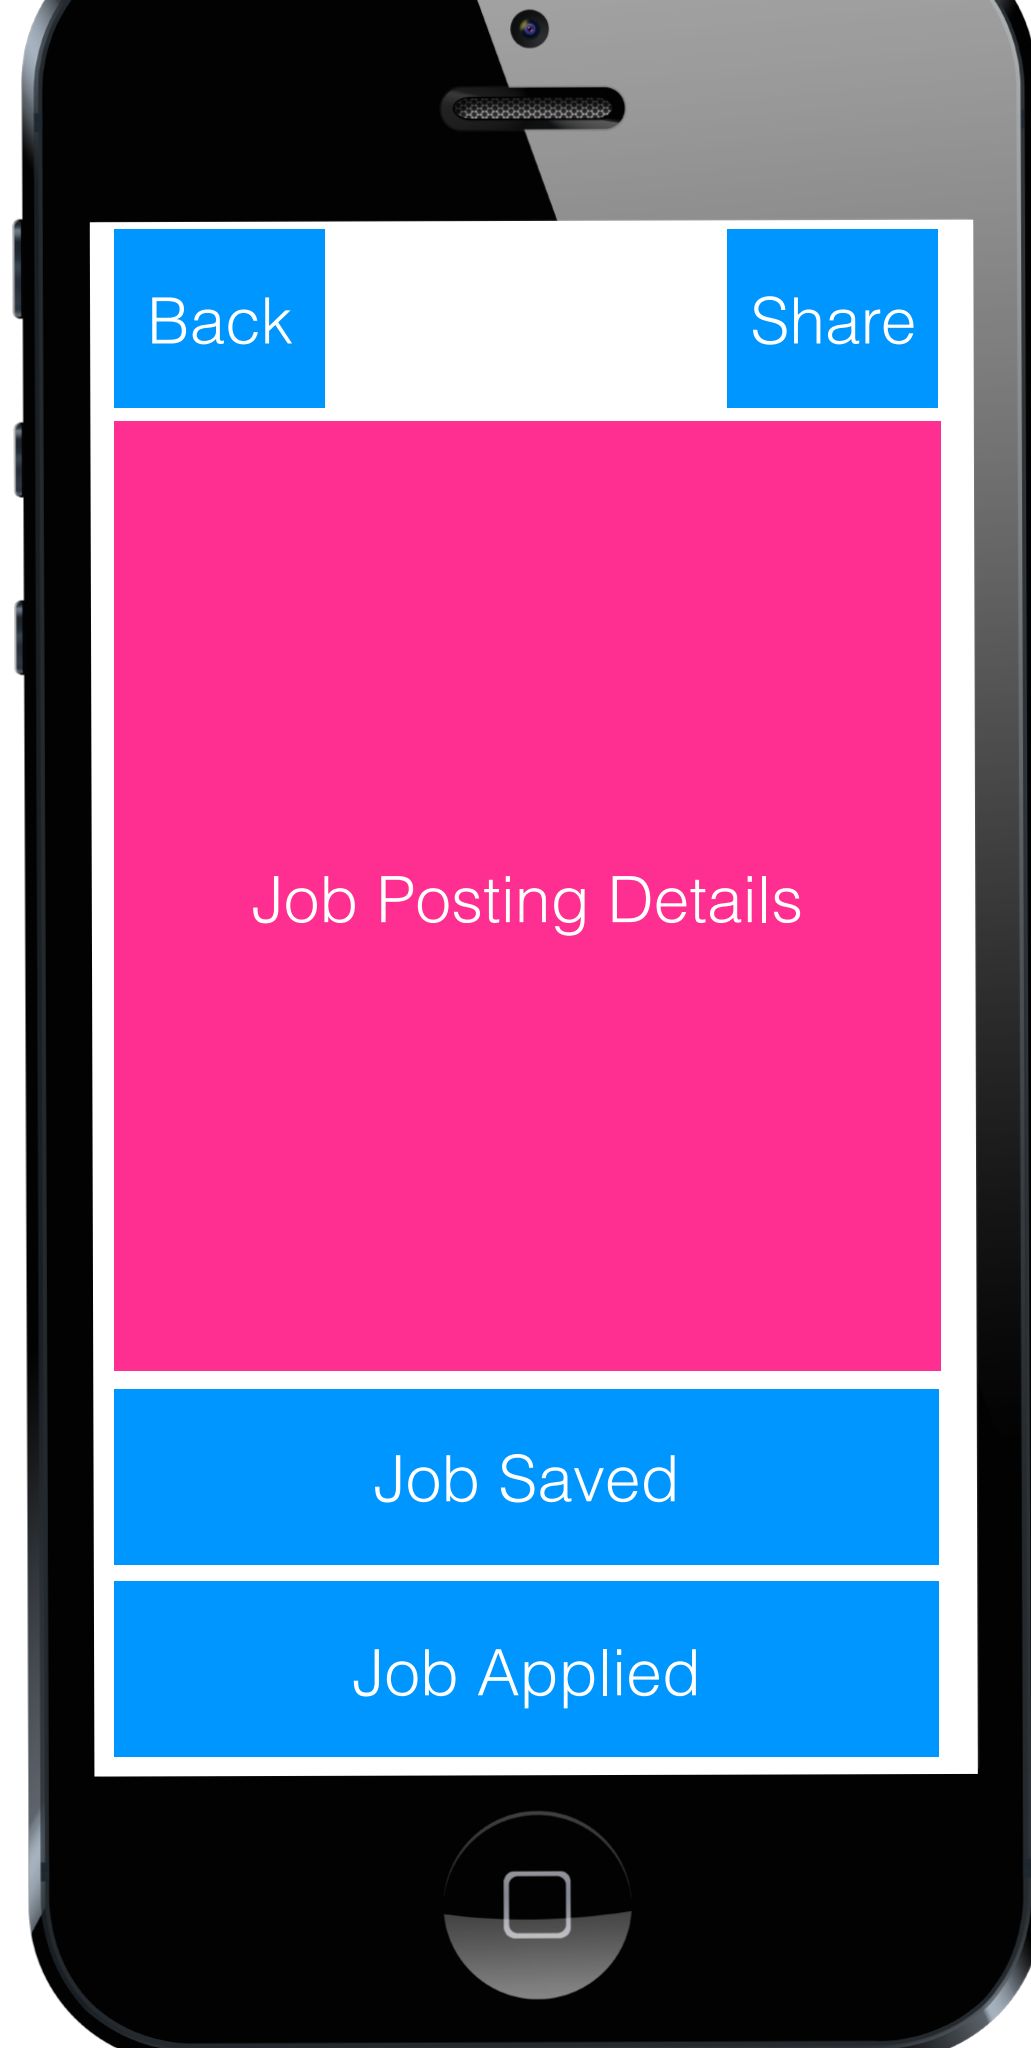

Job Posting Detail - Saved

The user has Saved the job for later, as indicated on the job posting.

Job Posting Detail - Applied

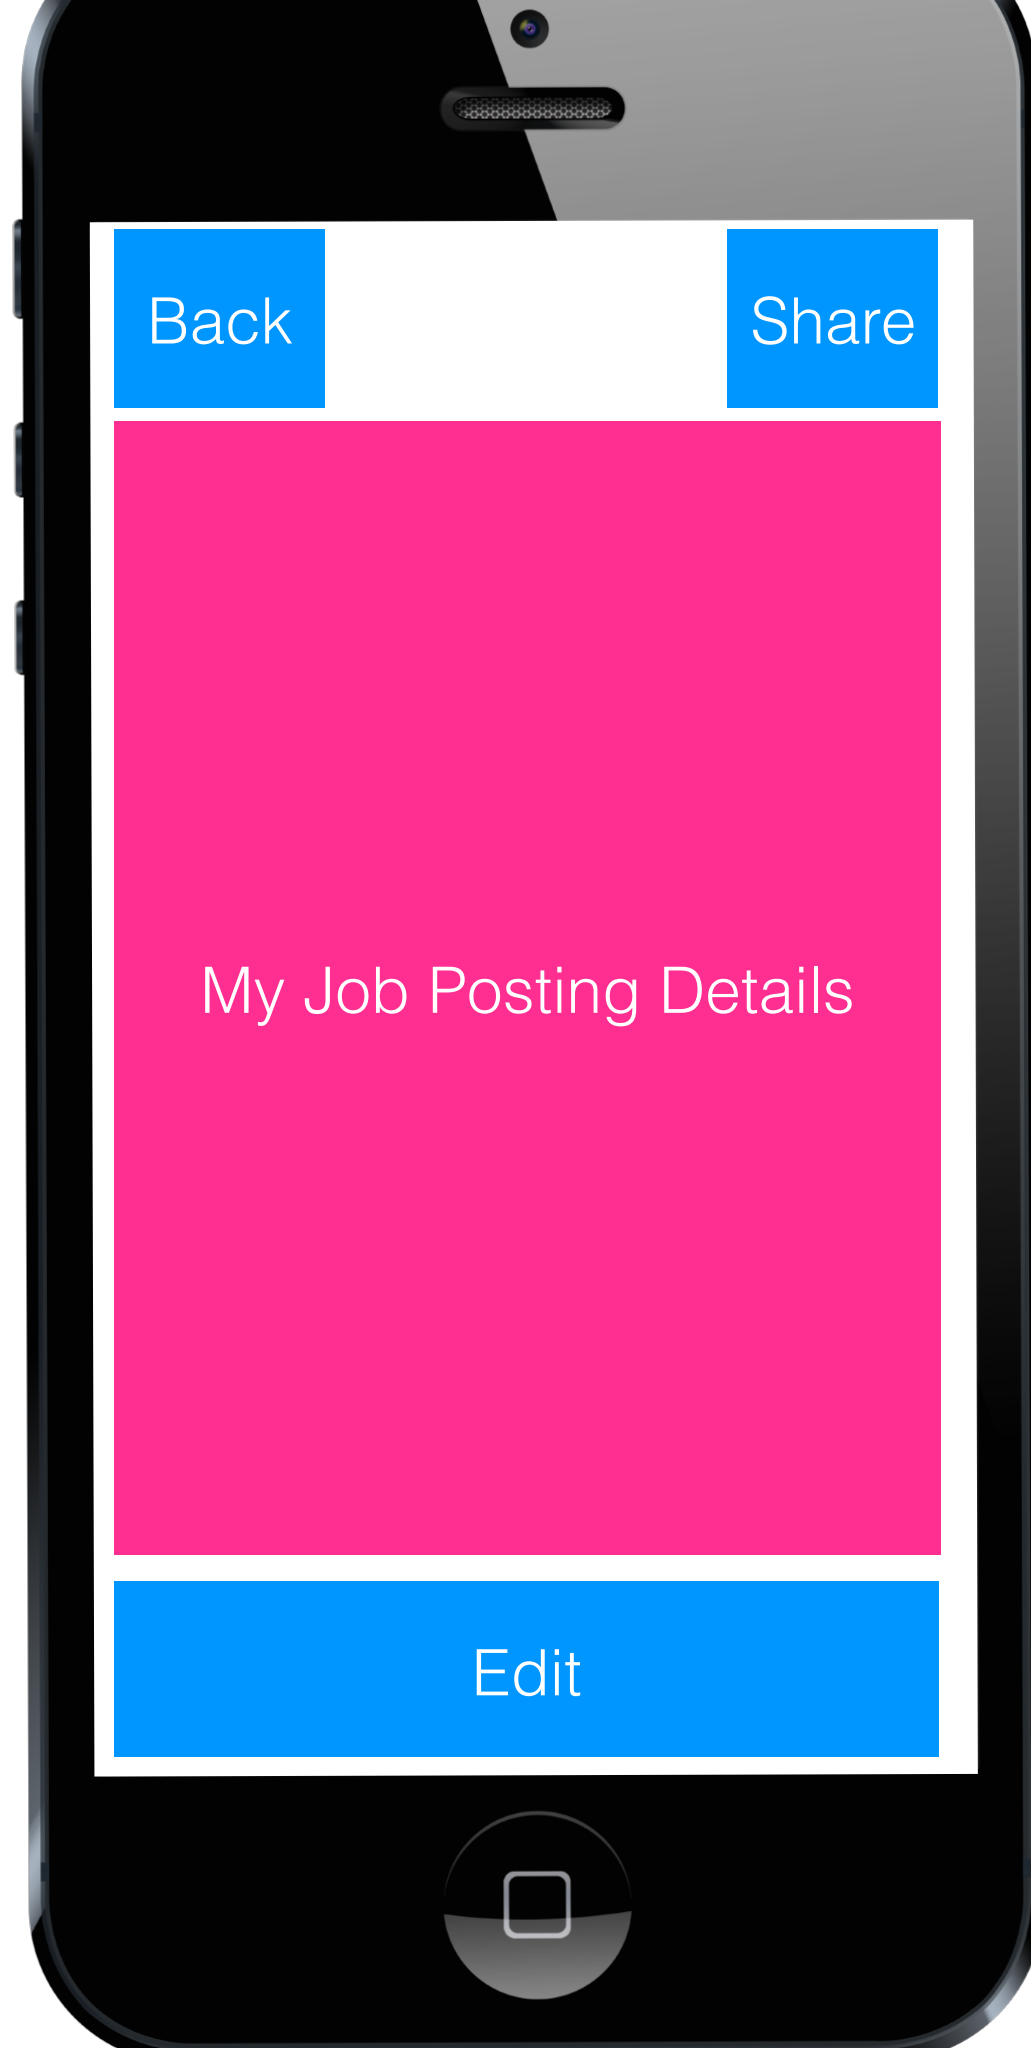

The user has applied for the job as noted in the Job Detail.

Crowd

My Job Posting
