FIRST RUN
User is presented with the
Register via email option or to
Remind him later

SKIP REGISTRATION
User is reminded they can still register the product in the Settings menu

Register Later

You can register PromptSmart by tapping on the Settings menu.
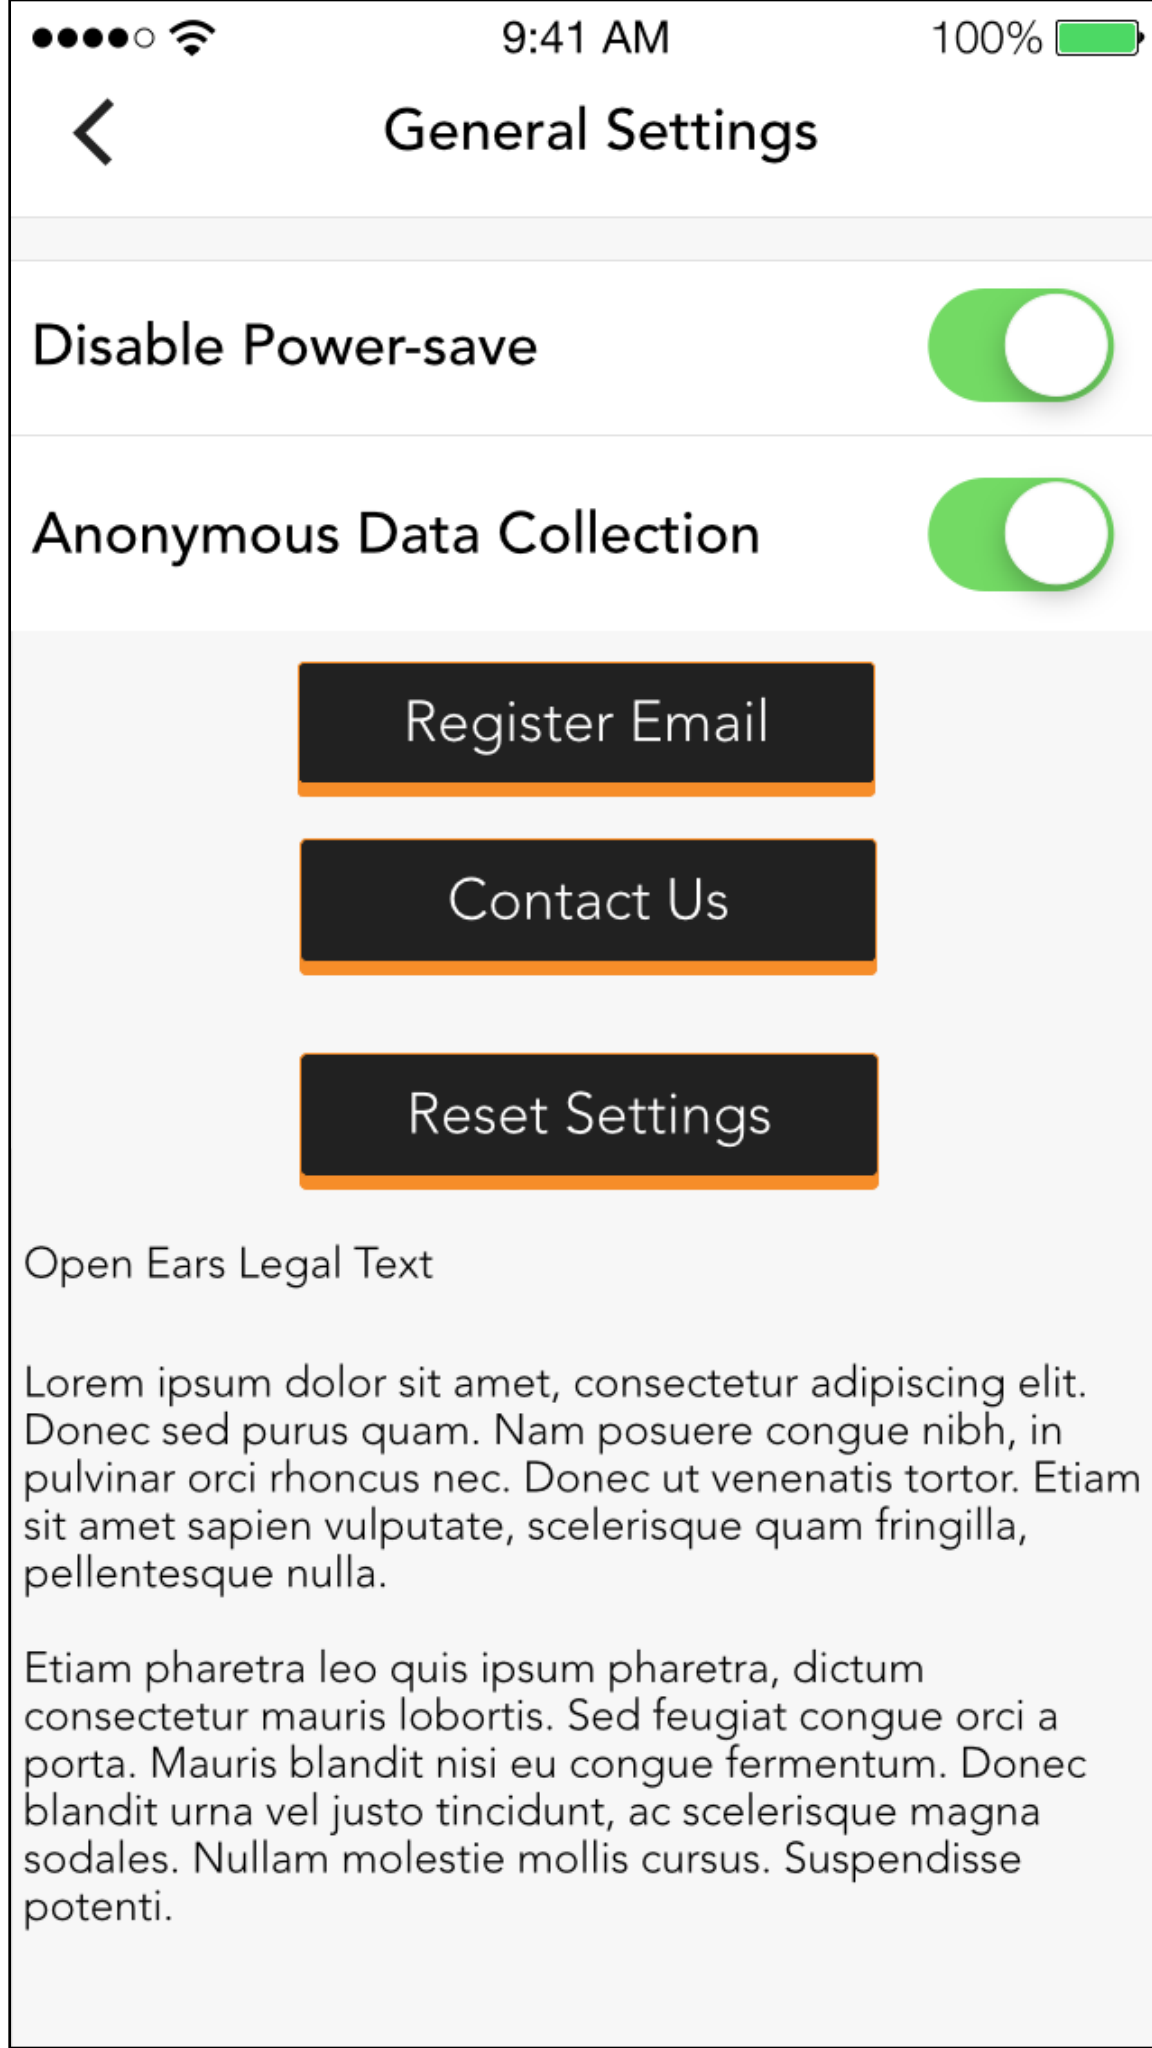

OK

ENTER EMAIL ADDRESS
User is told about registration and can enter email address (will use iOS Email keyboard).

Remind me later label/button will act as a "Skip" in this screen.

PROMPT SMART HOMESCREEN
Home screen with fast access to Scripts, Notecards and Recordings.

I like FAQ more than Help, but it could even be expanded into a full on Manual, or How to Use.

GENERAL SETTINGS
App wide settings, as well as helpful links to sections.

NEW OPTION
From the Main Screen, pressing New asks first if it is a Script or a Notecard, then follows the new Script/Notecard flow.

EMPTY SCRIPT LIBRARY
From the Main Screen, pressing New asks first if it is a Script or a Notecard, then follows the new Script/Notecard flow.

SCRIPT LIBRARY
This is the Script library.
Tapping on a script will take you
to the individual script view.

SEARCH LIBRARY
As you type, it filters out Scripts that do not match the search text. This can only search inside the Filenames, or in this case Titles of Scripts.
Functions the same for Notecards and Recordings.

SCRIPT SETTINGS
Full range of settings that apply to all Scripts.

COLOR PICKER
Set of colors to pick for Text,
also use this picker for
background.

NOTECARD LIBRARY
Just like the Scripts, this is a list of all the Notecards.

NOTECARD SETTINGS
Notecard specific settings.

SCRIPT & NOTECARD OPTIONS

With a swipe from the Right to the Left on a Script will slide the list item to the right, and shows options to share or delete the Script or Notecard.

SORT SCRIPTS/NOTECARDS
Tapping on the Sort item will bring up a dial to select a sort method.

This is the text of the script, right now it is not editable but it will continue in this box until it fills the entire box.

The rest of this text is just filler to illustrate how much preview text will appear when you view a script.

Lorem ipsum dolor sit amet, consectetur adipiscing elit. Donec sed purus quam. Nam posuere congue nibh, in pulvinar orci rhoncus nec. Donec ut venenatis tortor. Etiam sit amet sapien vulputate, scelerisque quam fringilla, pellentesque nulla.

Etiam pharetra leo quis ipsum pharetra, dictum consectetur mauris lobortis. Sed feugiat congue orci a porta. Mauris blandit nisi eu congue fermentum. Donec blandit urna vel justo tincidunt, ac scelerisque magna sodales. Nullam molestie mollis cursus. Suspendisse potenti.

VIEW A SCRIPT
This is the full view of a script that was either imported or typed on the device. The Pencil Icon will let you edit it. The Aᴀ button will let you adjust the size of the display text. The Play button will start the Prompt session. The Speedometer will let you adjust the scrolling speed of the Prompter. The Share button will let you share the script.
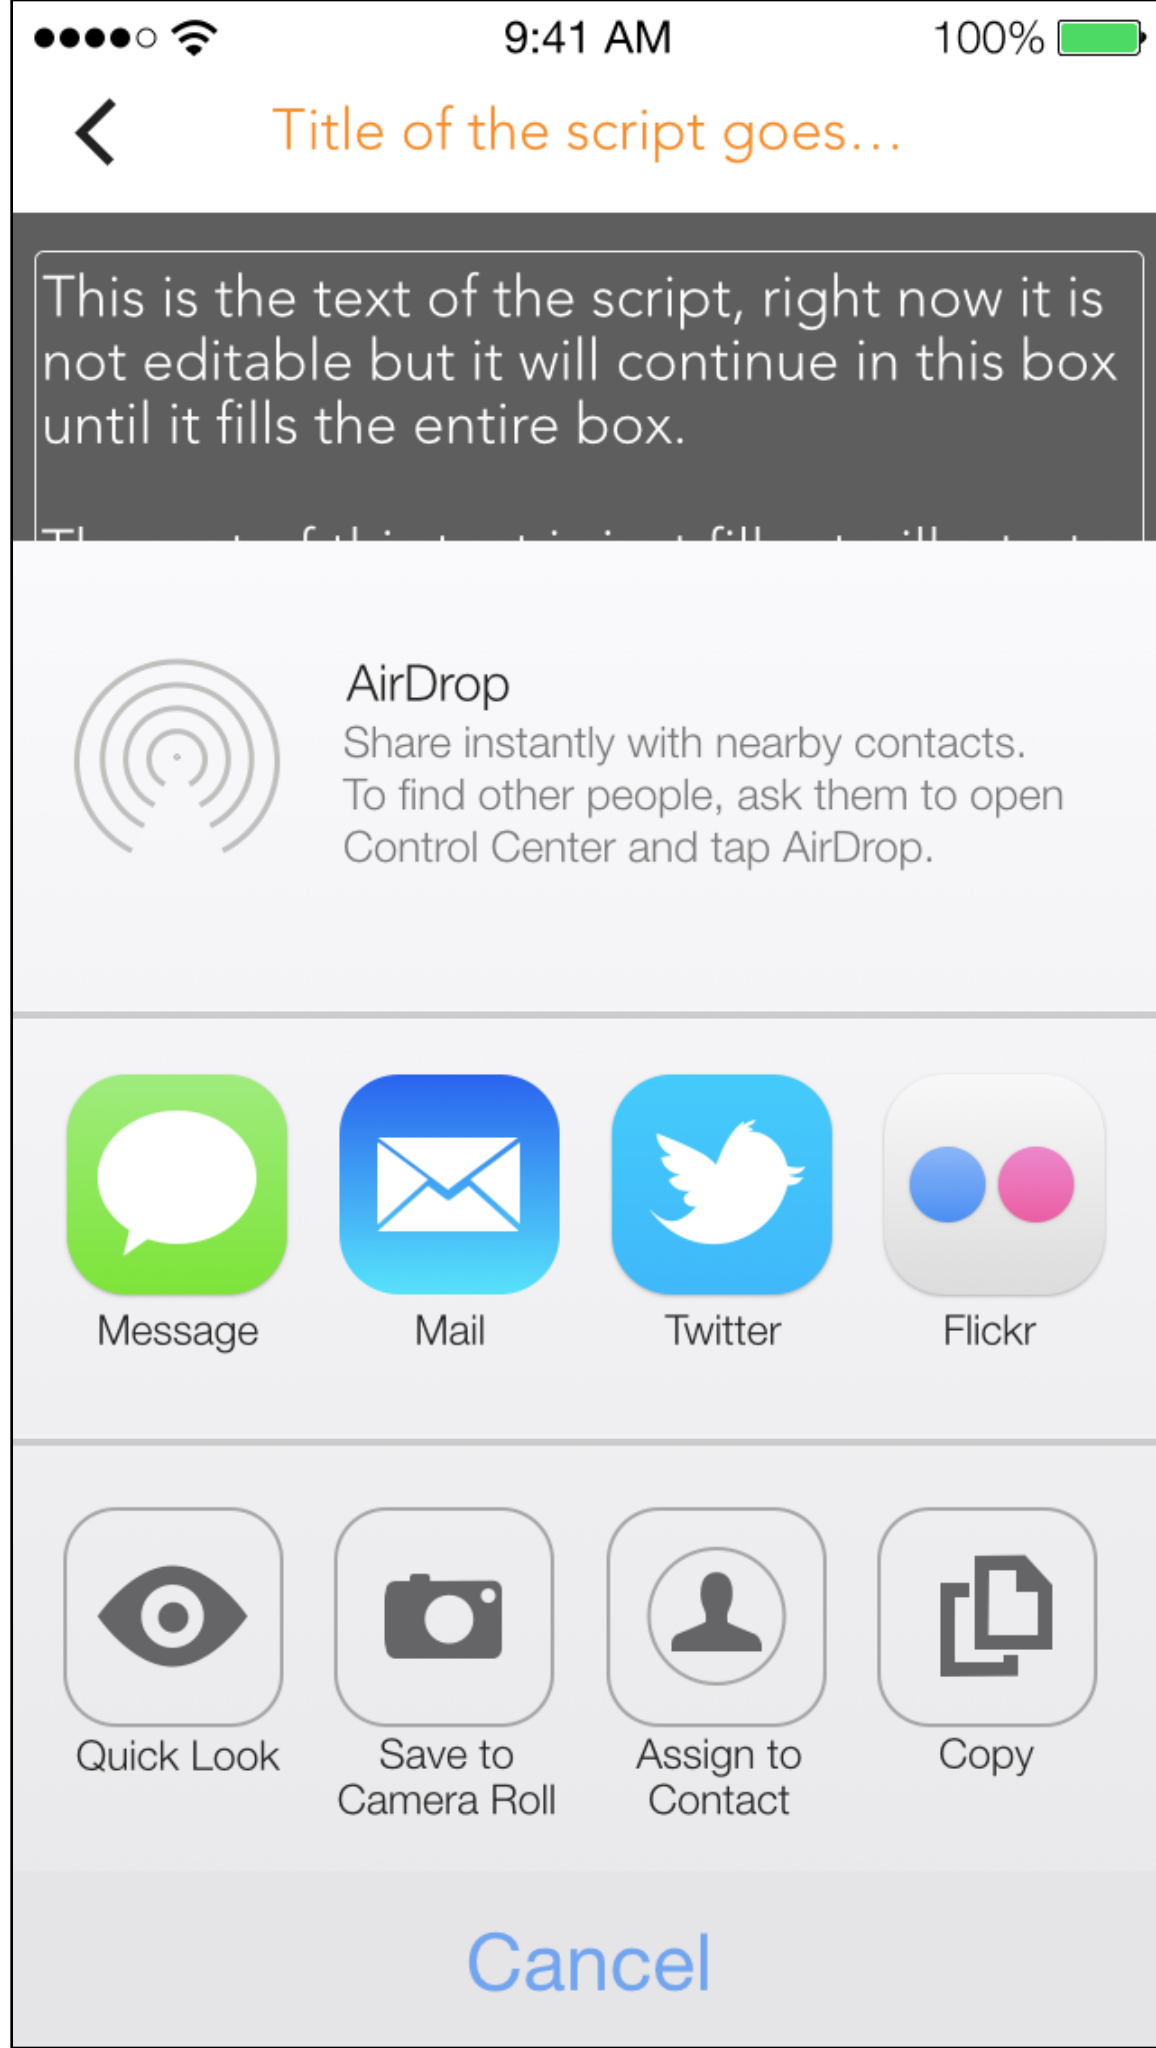

SHARE A SCRIPT
The Share button pulls up the iOS Share panel.

Note, this is the default share configuration, I'm not suggesting we share Scripts on Flickr, etc… Once we have the Share panel working, we will determine which share options are ideal for Scripts.
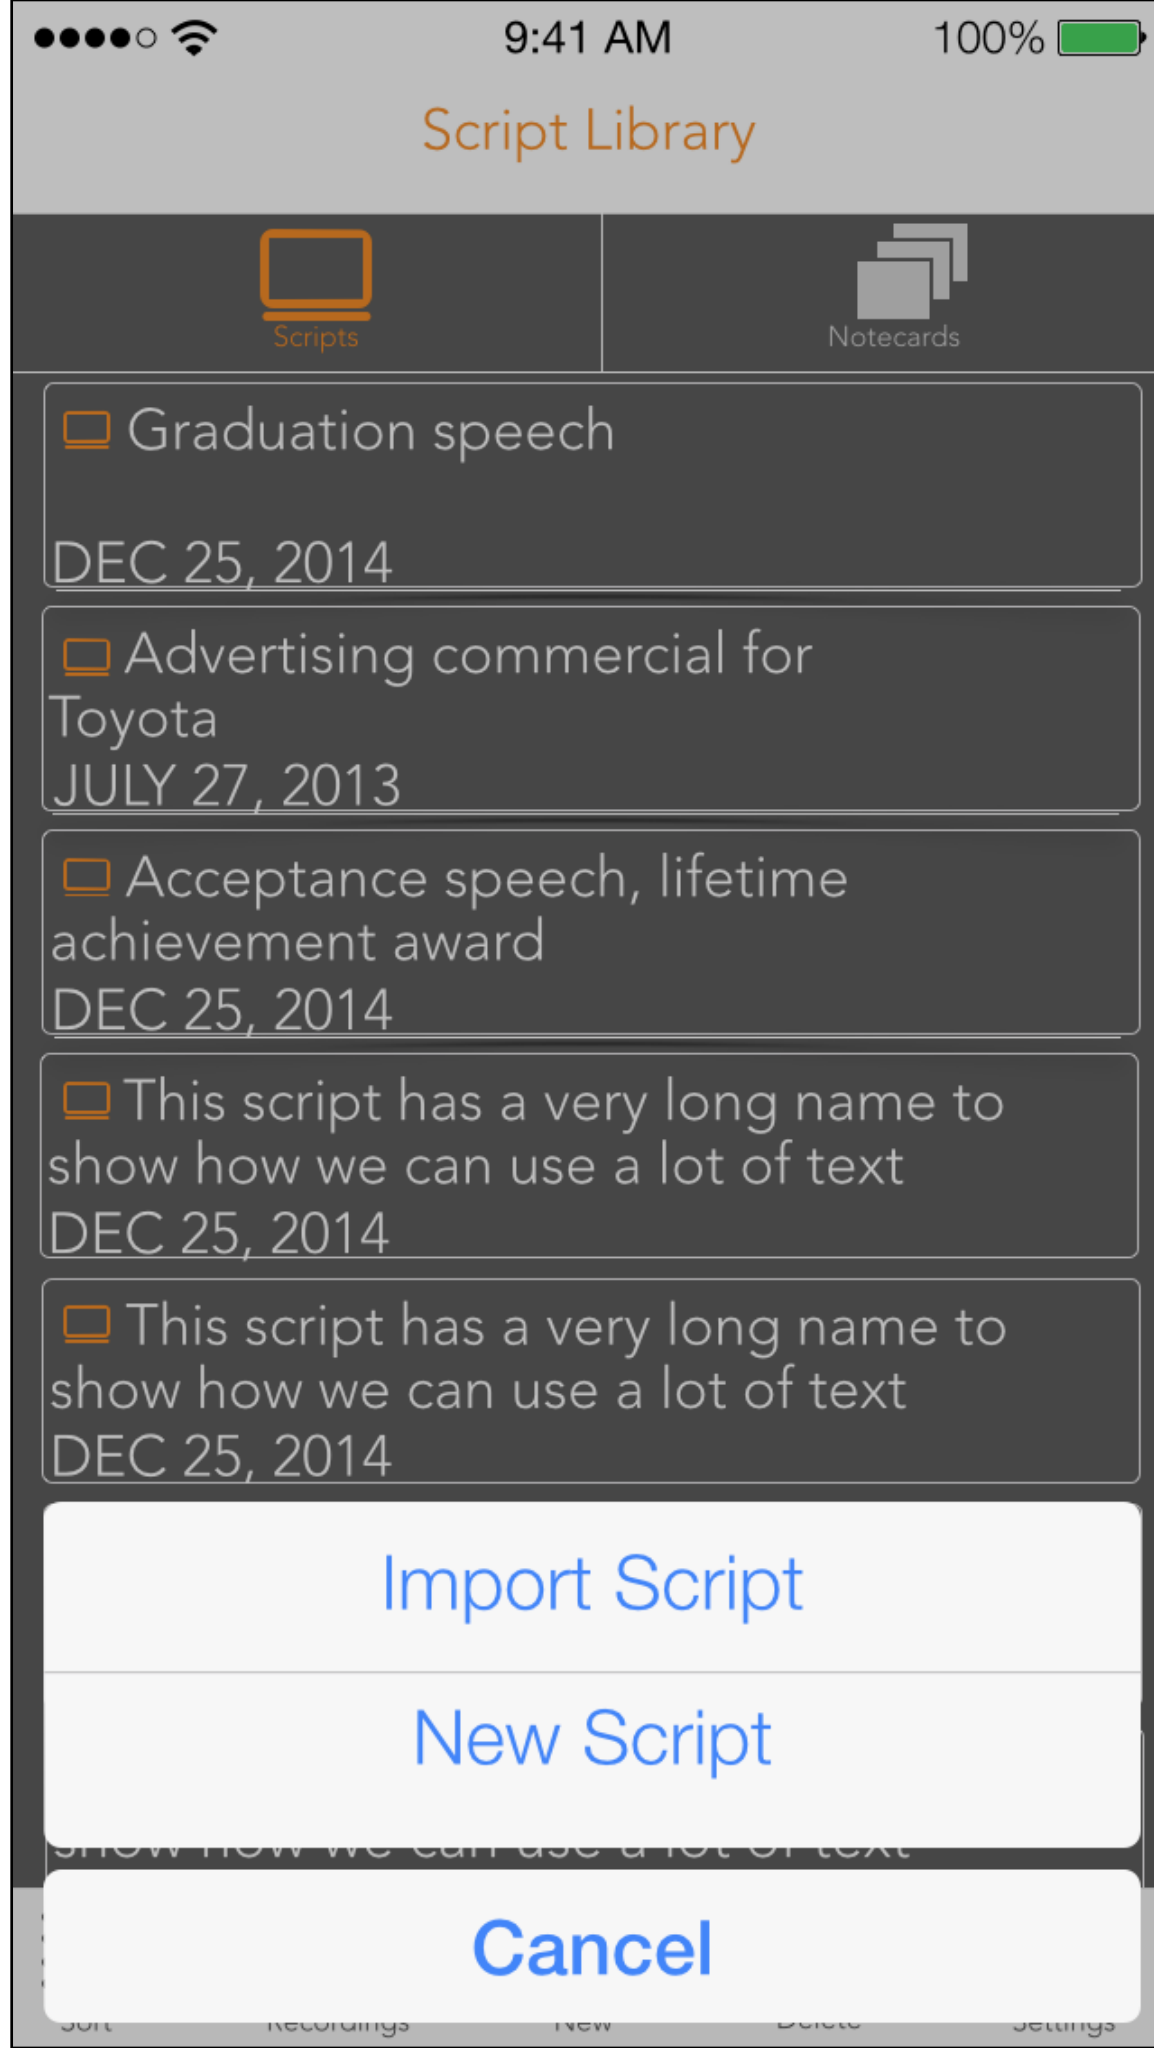

NEW SCRIPT

Tapping on the New Script icon begins the process of creating or importing a new script. The user must choose to import from a file (Starting the Ink File Picker) or creating a new blank script.

PR■MPTSMART
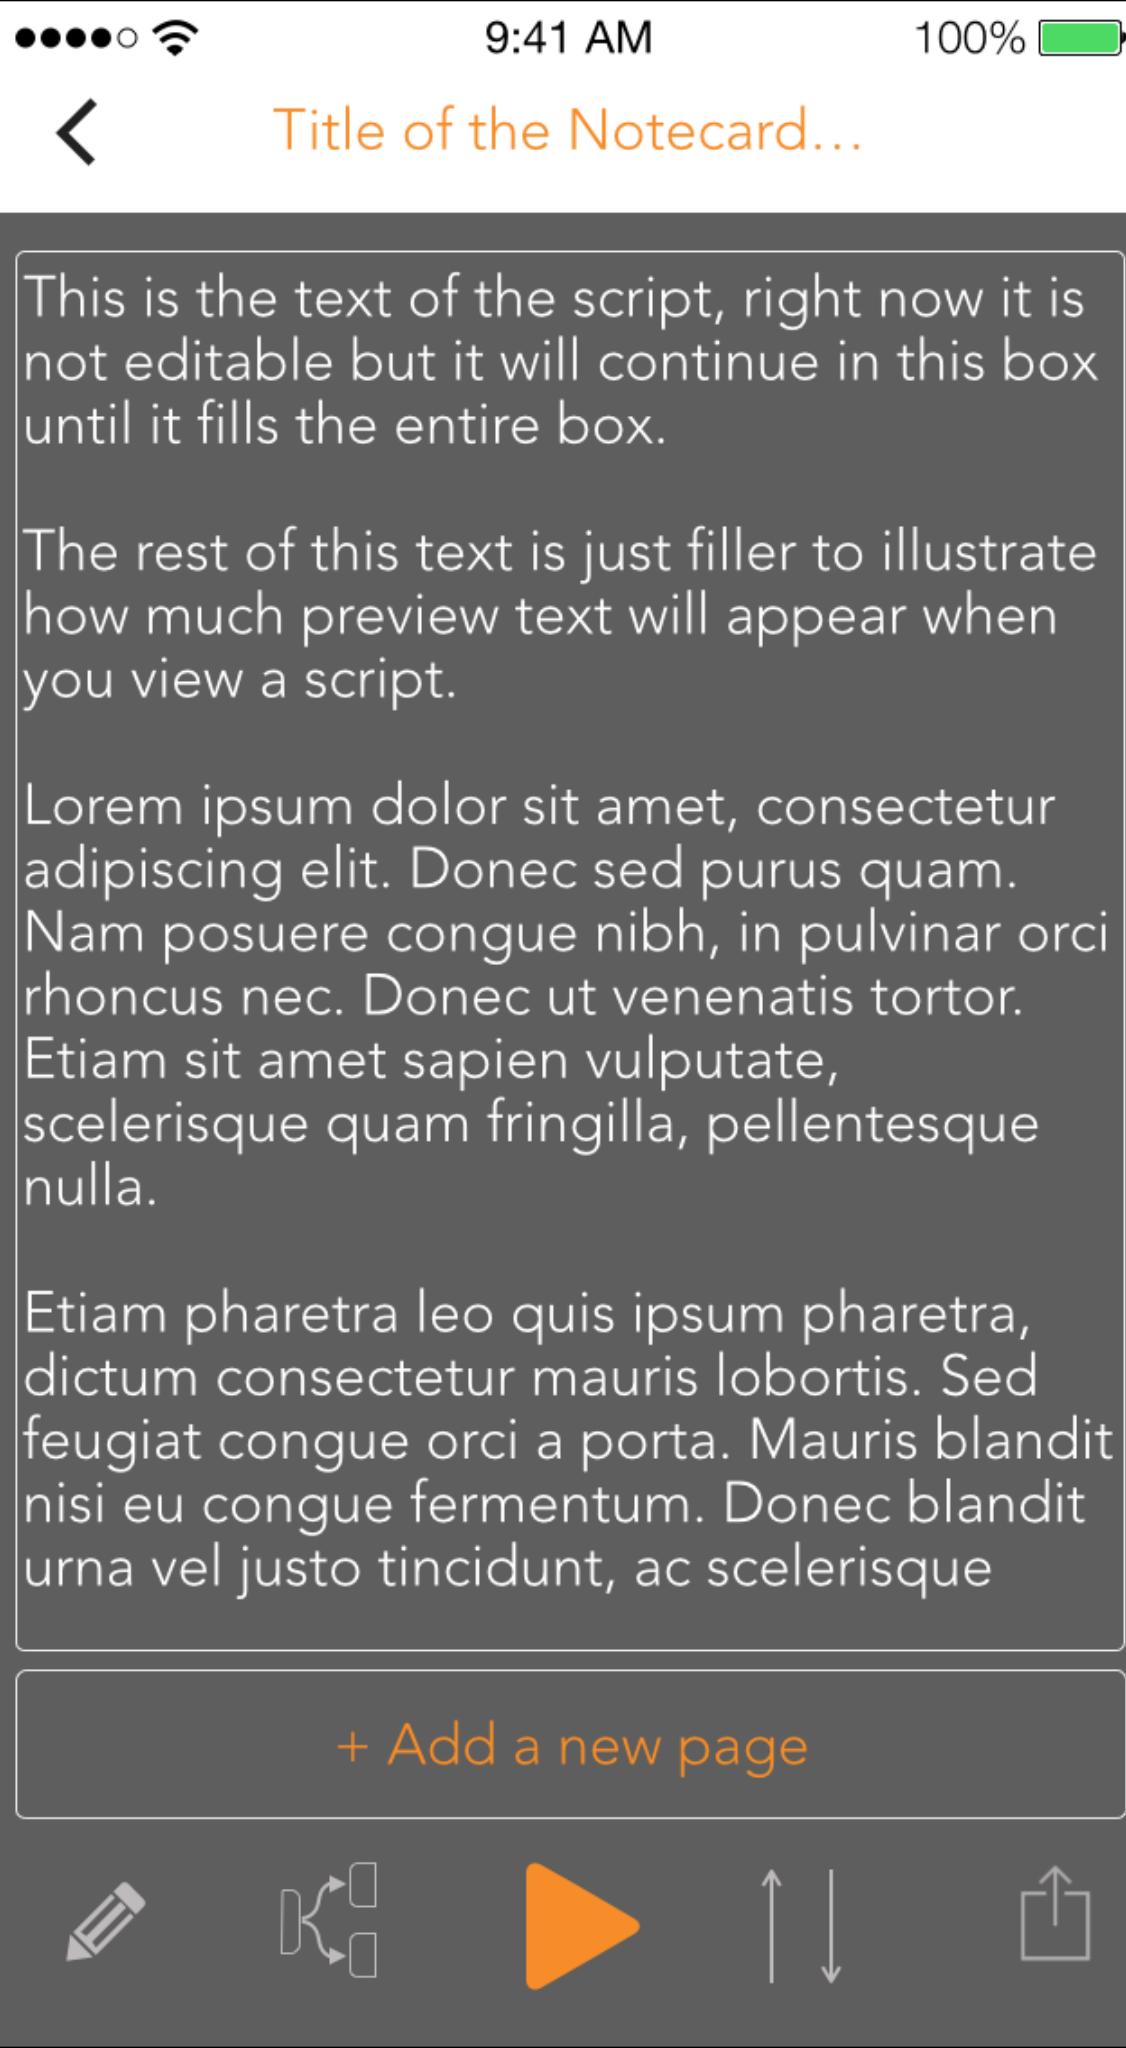

NOTECARD VIEW

This is a filled out notecard that has just been imported from a file. Right now it is just one single notecard (it has only 1 page).

There are an edit, split,play,reorder and share buttons

Title of the Notecard…

This is the text of the script, right now it is not editable but it will continue in this box until it fills the entire box.

The rest of this text is just filler to illustrate how much preview text will appear when you view a script.

Lorem ipsum dolor sit amet, consectetur adipiscing elit. Donec sed purus quam. Nam posuere congue nibh, in pulvinar orci rhoncus nec. Donec ut venenatis tortor. Etiam sit amet sapien vulputate, scelerisque quam fringilla, pellentesque nulla.

+ Add a new page

SPLIT CARD
Pressing the Split Notecard button will cause the text to slide down for instructions. In this mode, you highlight the text to create a split.

Note: When we start using this feature, we might want to hide all the buttons at the bottom.
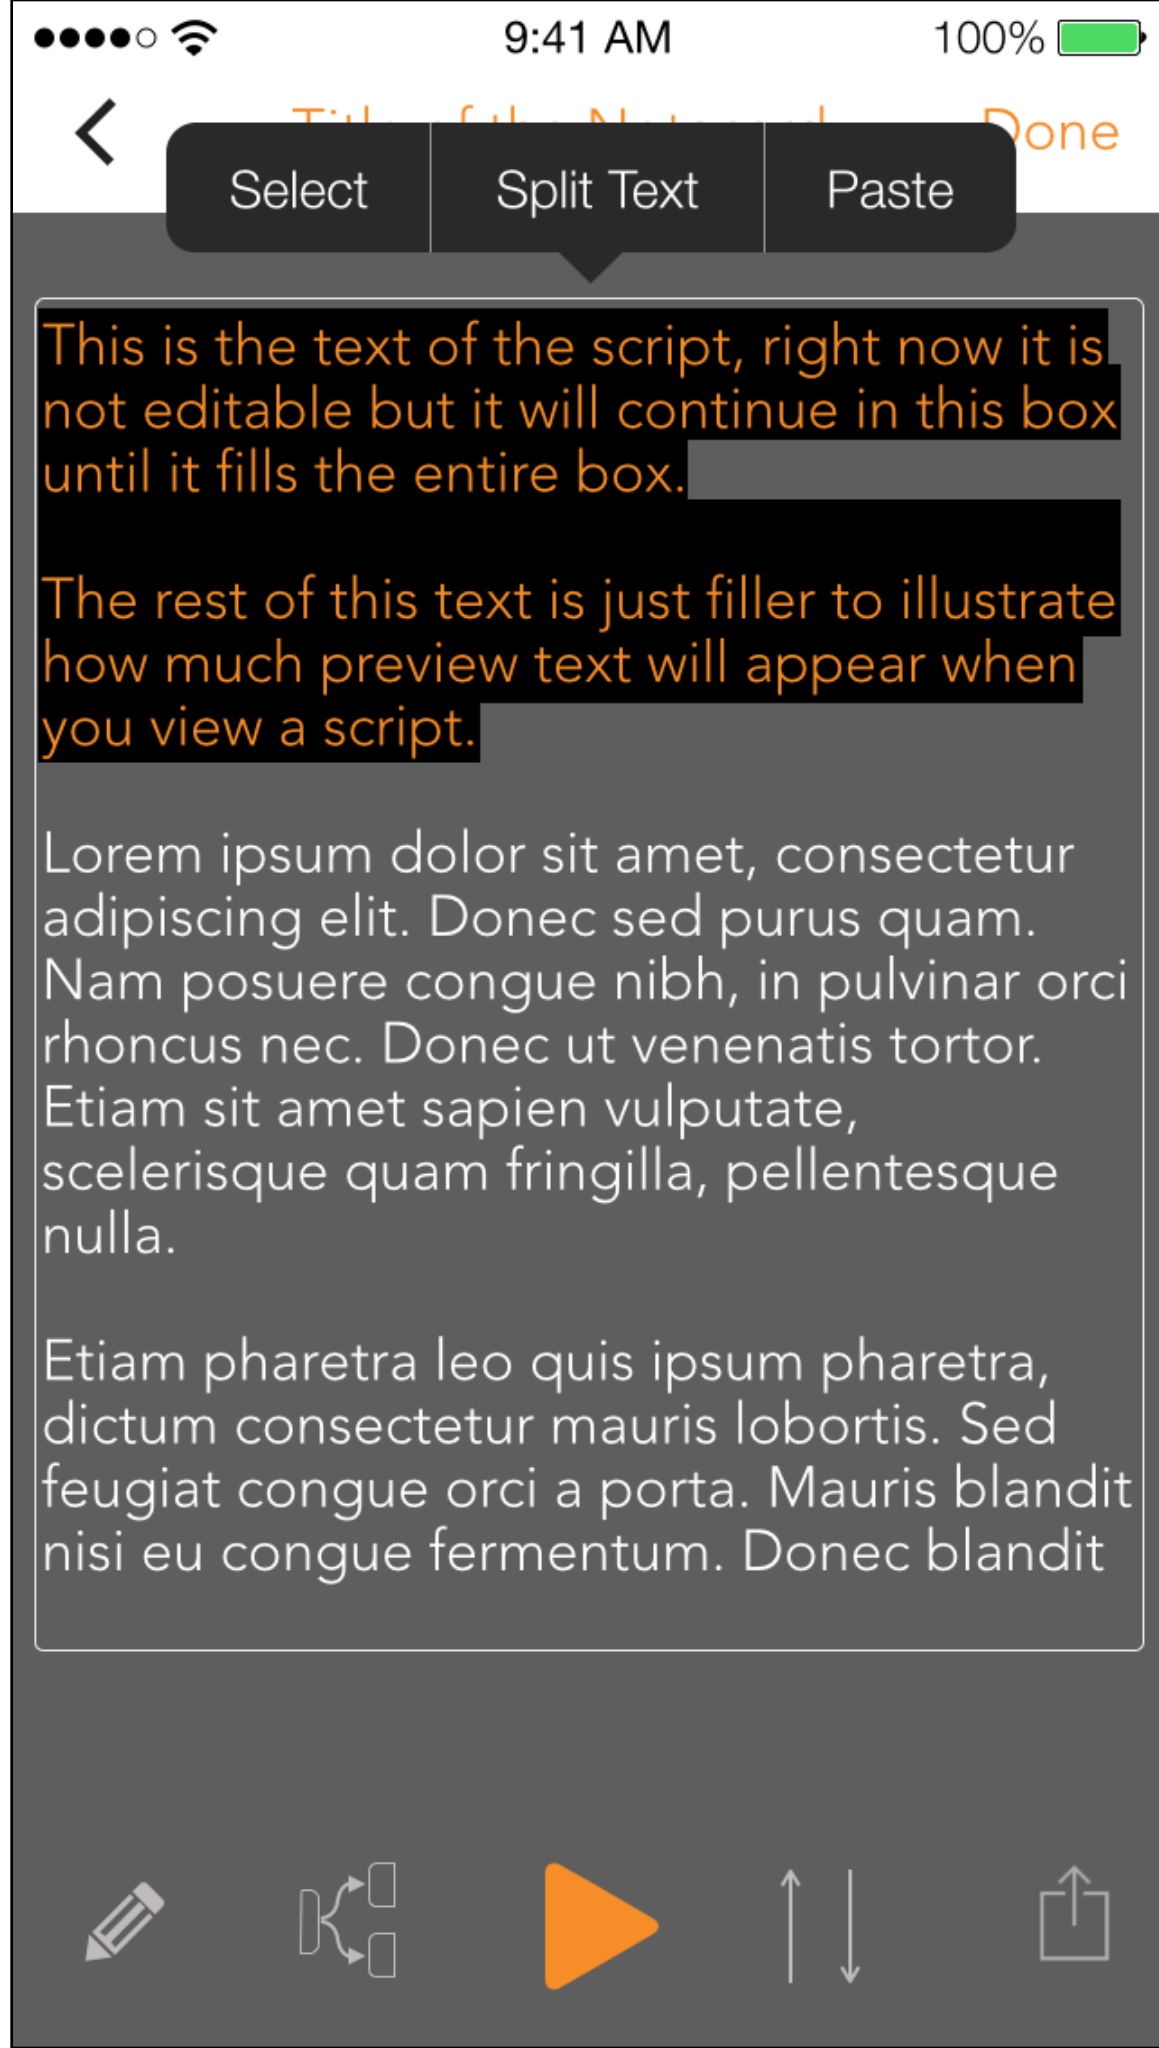

SPLIT CARD
Once the text is selected, you are given the iOS Menu controller, that will contain our custom commands.

Note: I'm using a template of the Menu Controller in this screenshot. We will not be actually Copying or Pasting text here, like the Split Text, we will use our own controls here. It's possible this will ONLY say Split Text.

NOTECARD VIEW
Now we are back at the Note Card view, and now there are 2 notecards created from the split we just performed.

NOTECARD VIEW
Next we are going to reorder the cards. In this screen we have 4 notecards, we are going to press the reorder button.
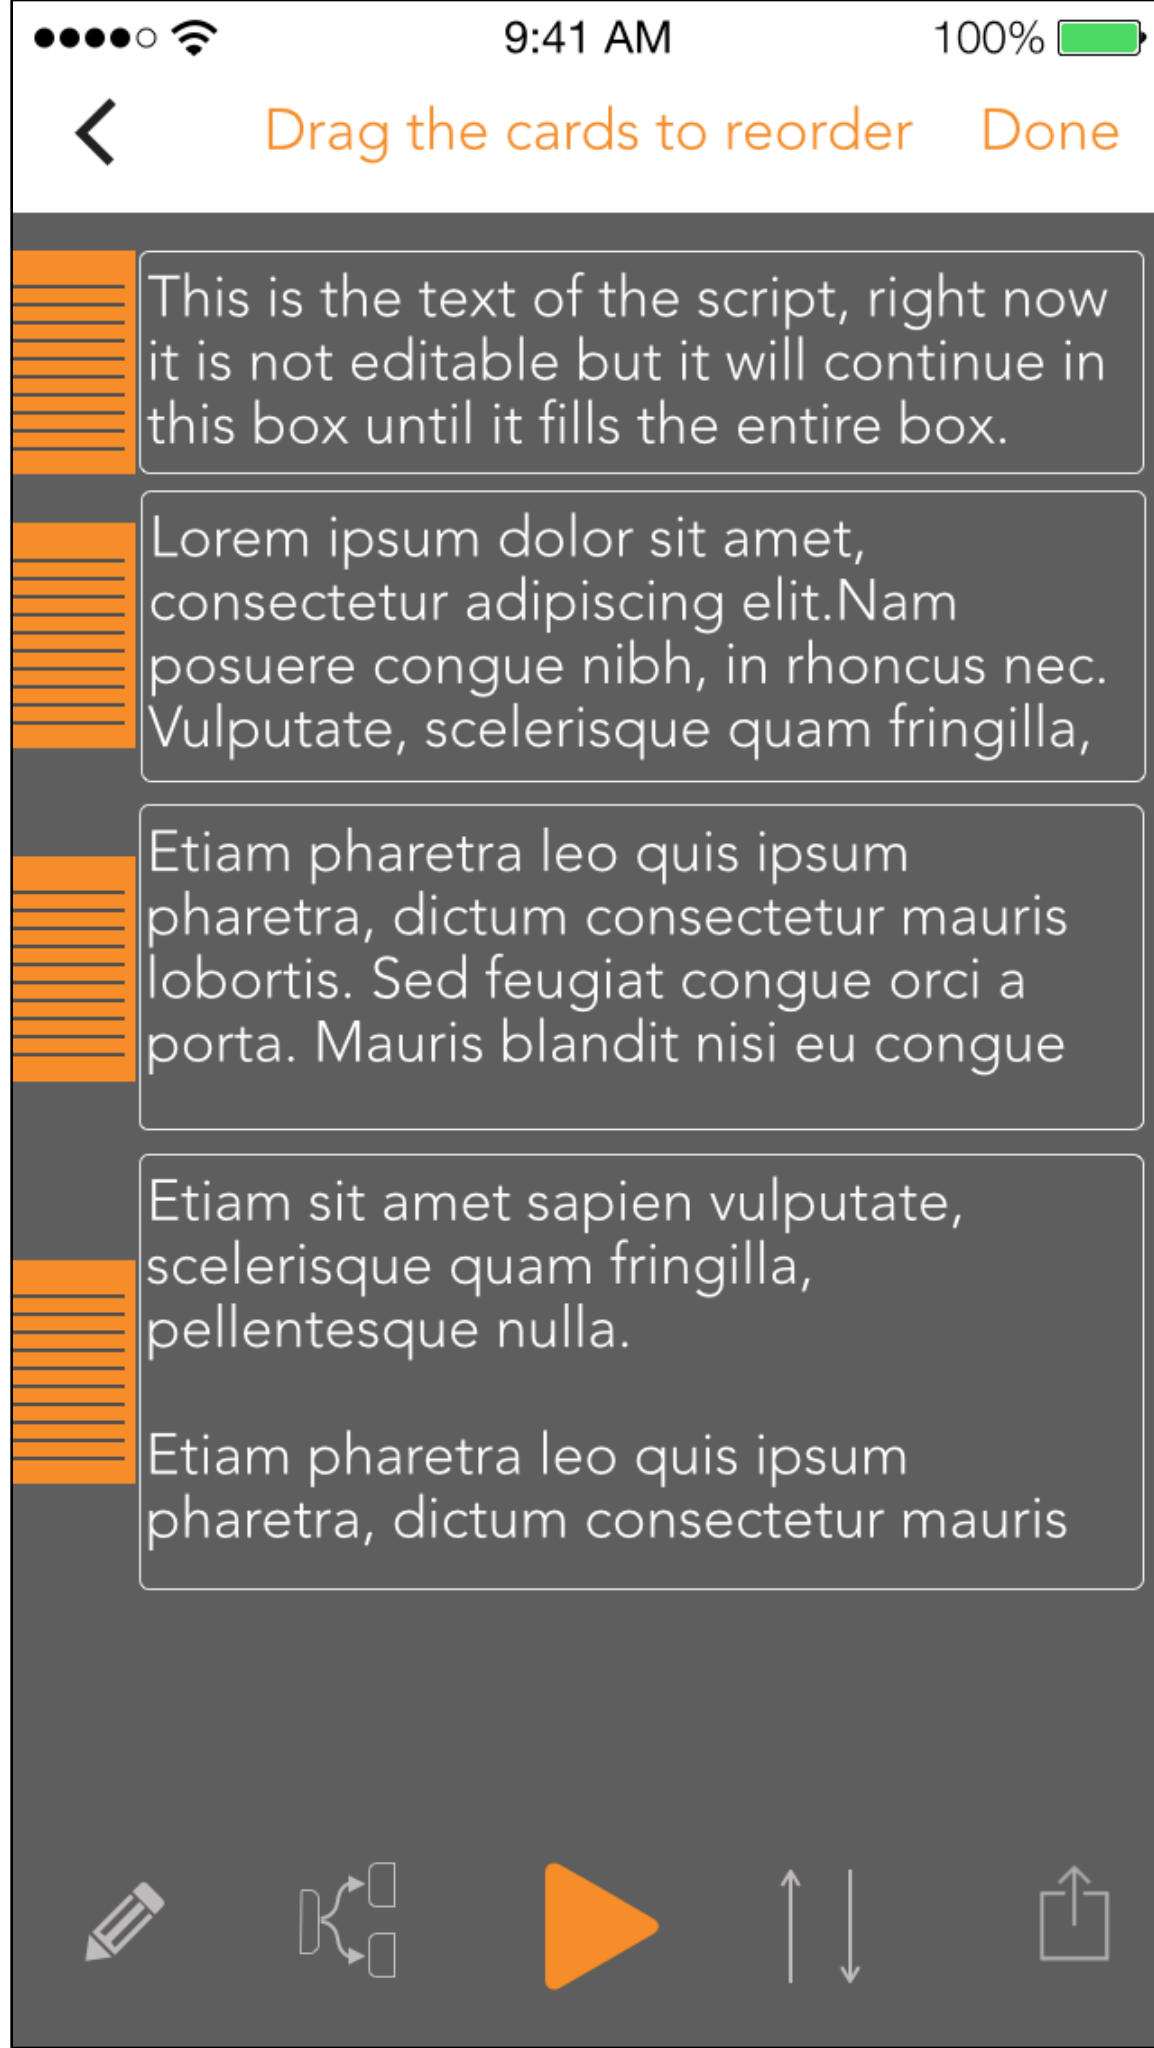

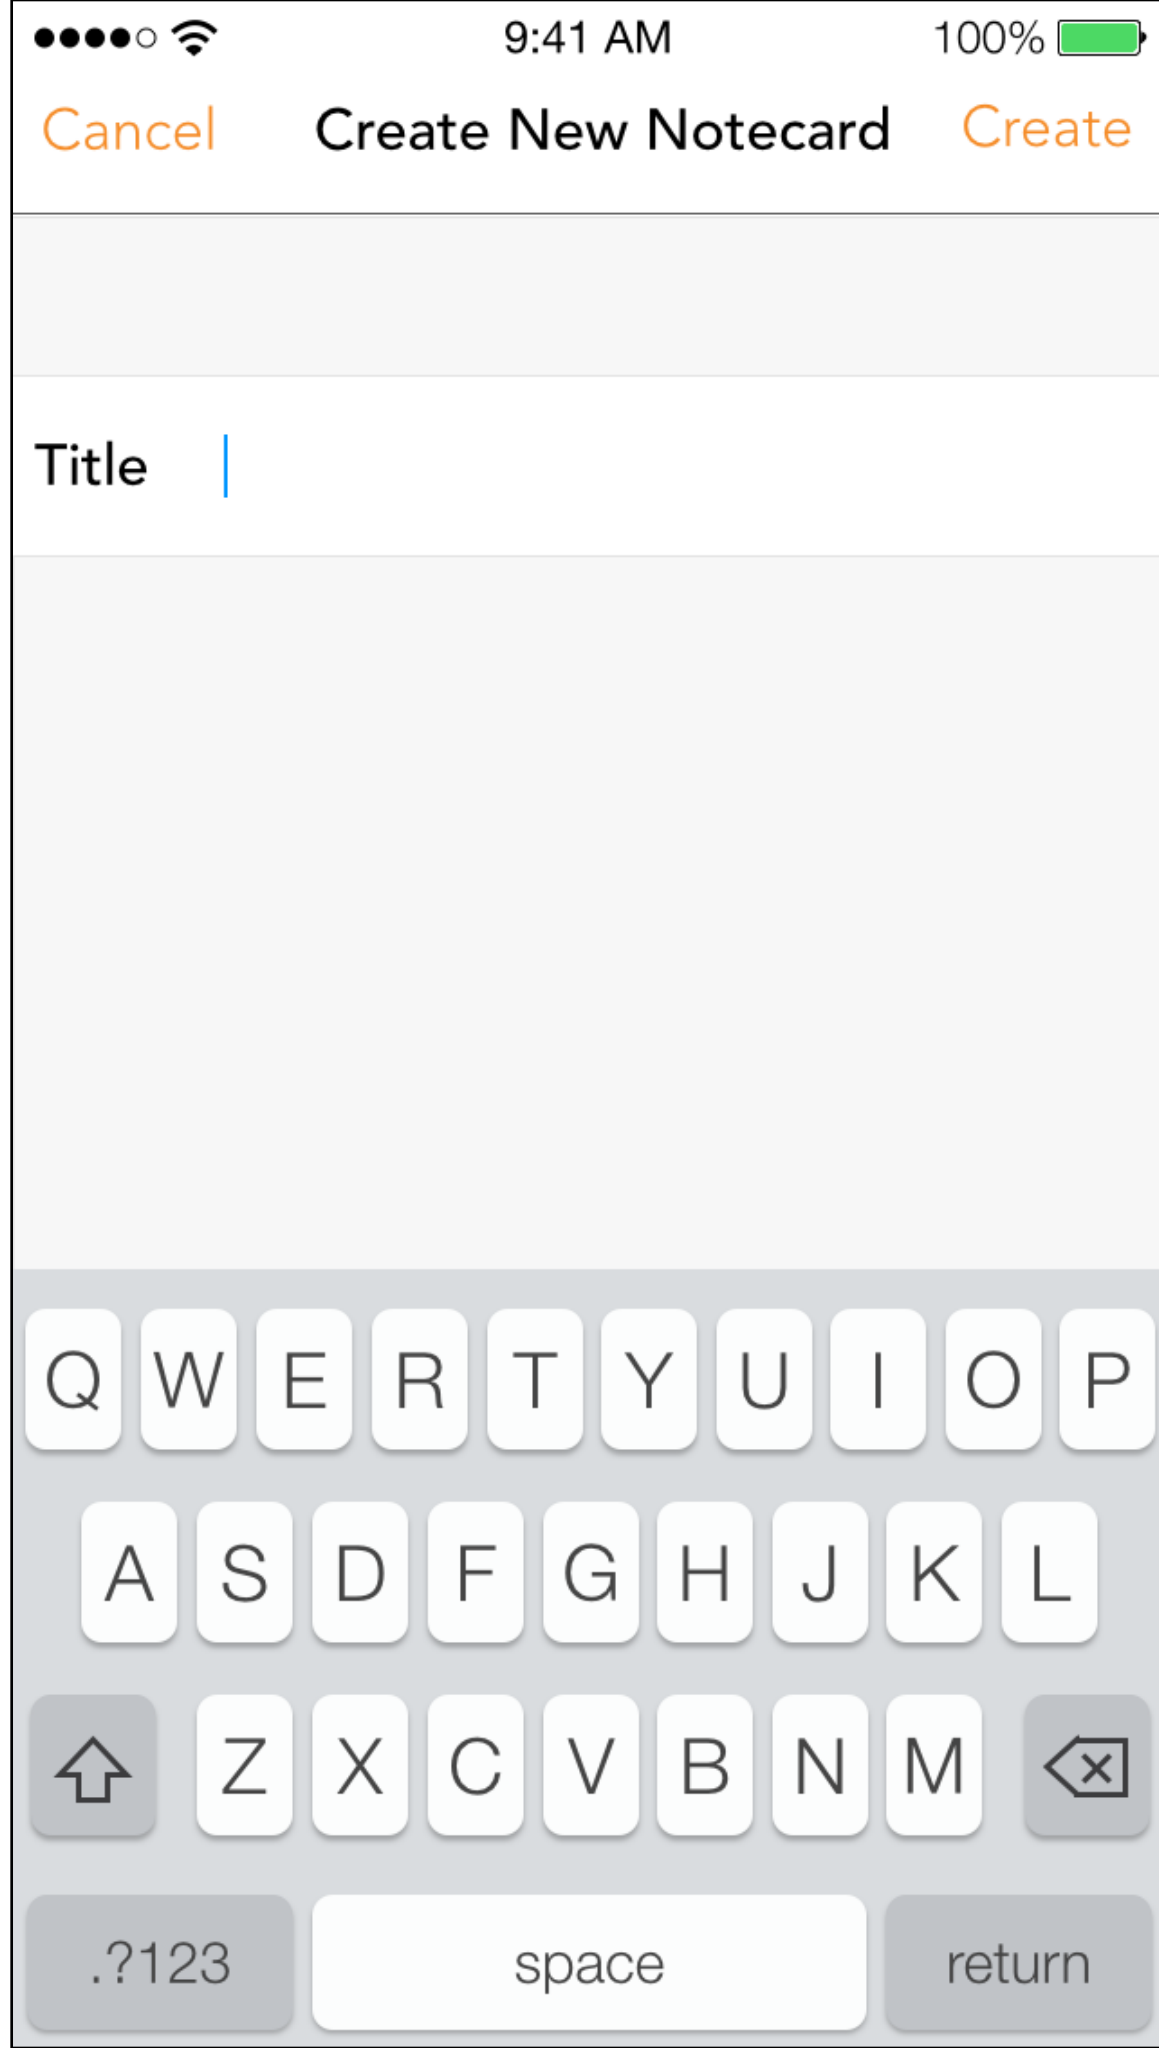

REORDER VIEW
Pressing the Reorder button slides the notecards to the right, and reveals a handy reorder handle (but you can use any part of the notecard).

To reorder, drag a card up or down and it will swap places with the existing card in that location.

confidential
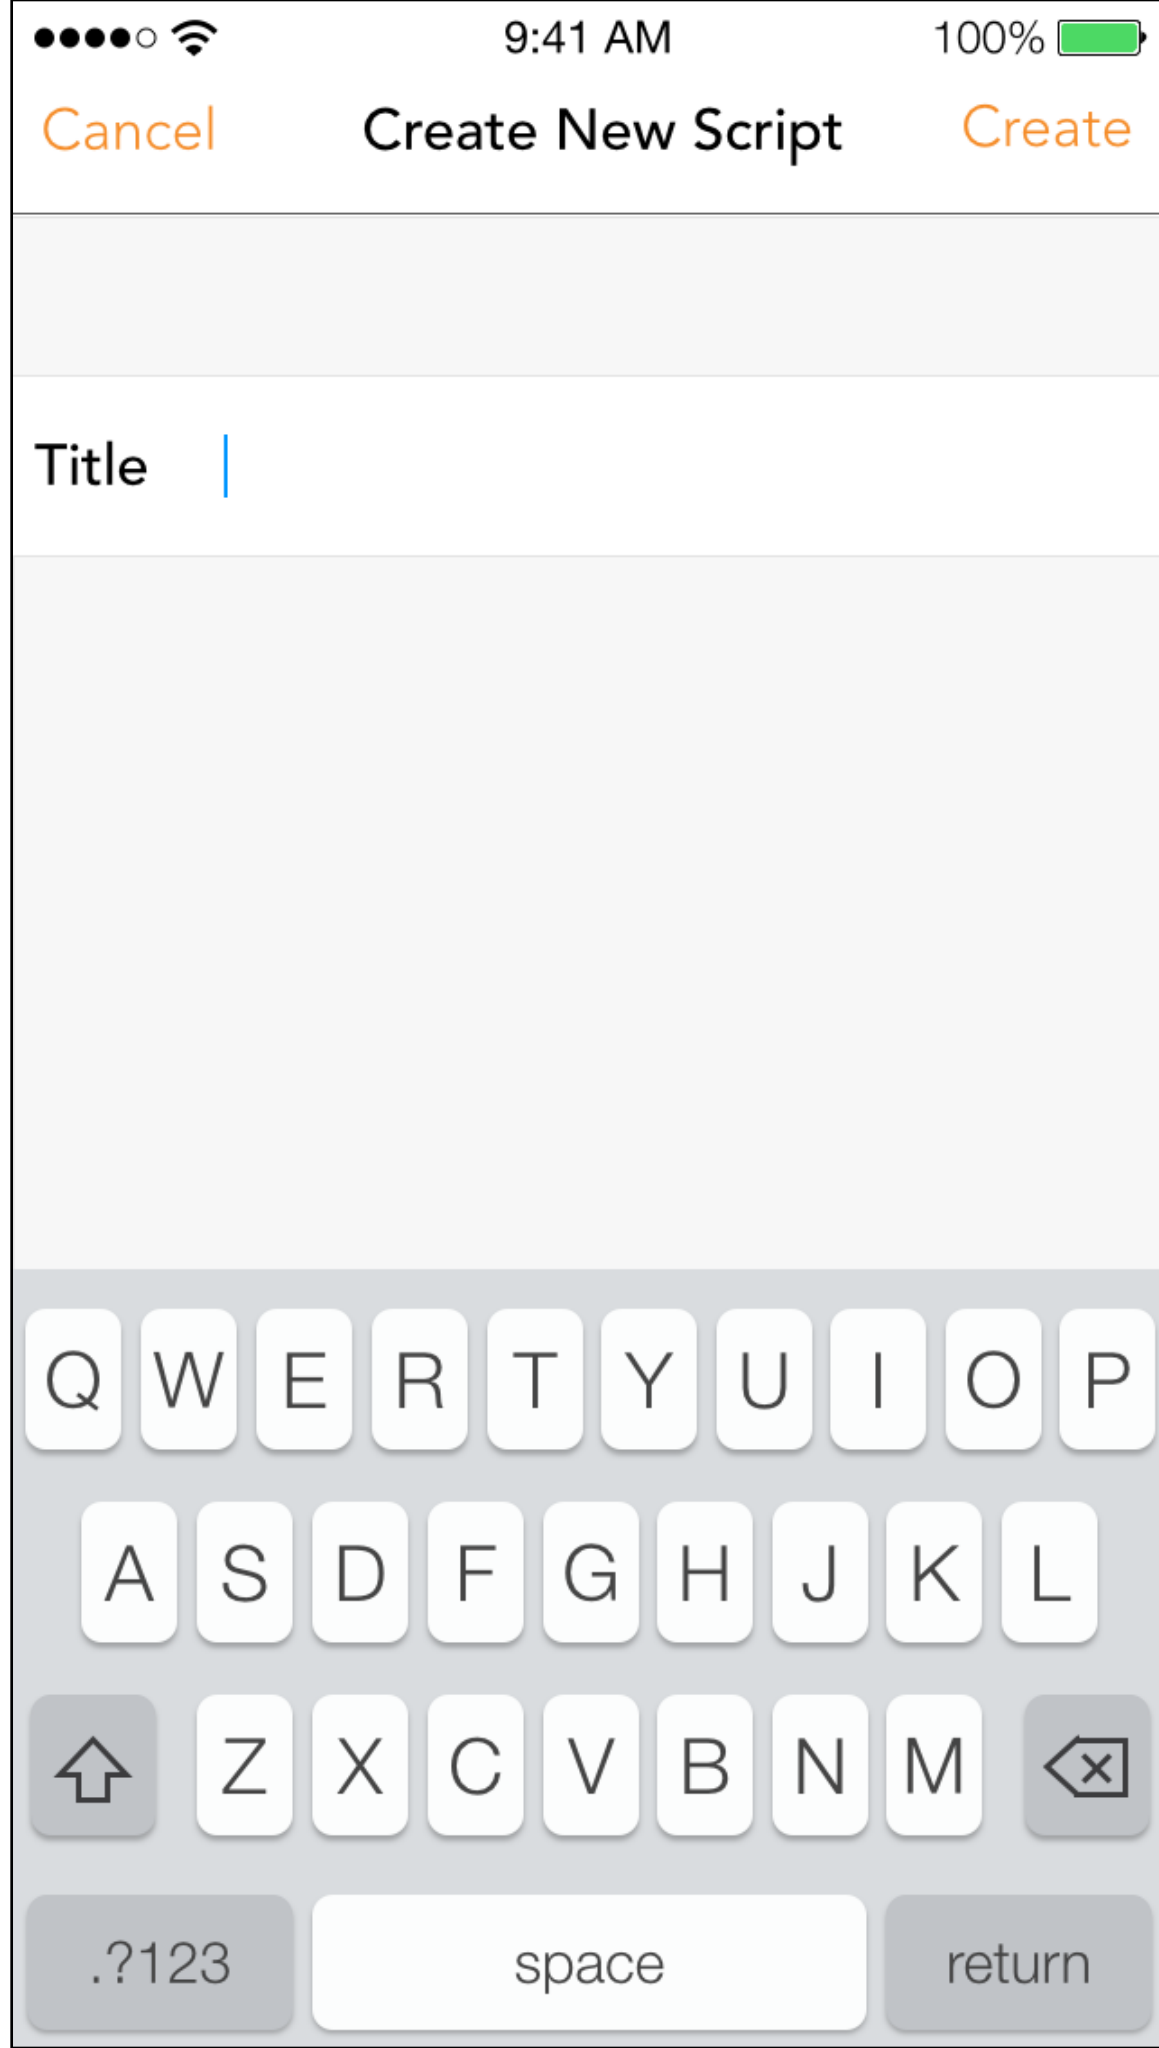

NAME NEW SCRIPT
When creating a new script, you are first asked to name the script.

NAME NEW NOTECARD

When creating a new notecard, you are first asked to name the notecard.

ENTER SCRIPT TEXT

After naming a new script you can enter the text.

Look at Teleprompt + settings ($15 app).

Look for options.

ENTER NOTECARD TEXT
After naming a new Notecard you can enter the text.

The arrow buttons allow you to page through the notecard. The New Notecard button (in the middle) will insert a new notecard.

Note, we are using a prebuilt system for RTF text, what I drew is an approximation of their UI.

Script Name Here   Save

This box contains the text you can type a Script into.

Q W E R T Y U I O P

A S D F G H J K L

**PR❖MPT**SMART

EDITING EXISTING SCRIPT
This is editing an existing script, this process is the same for an imported document, or a script created entirely on device.
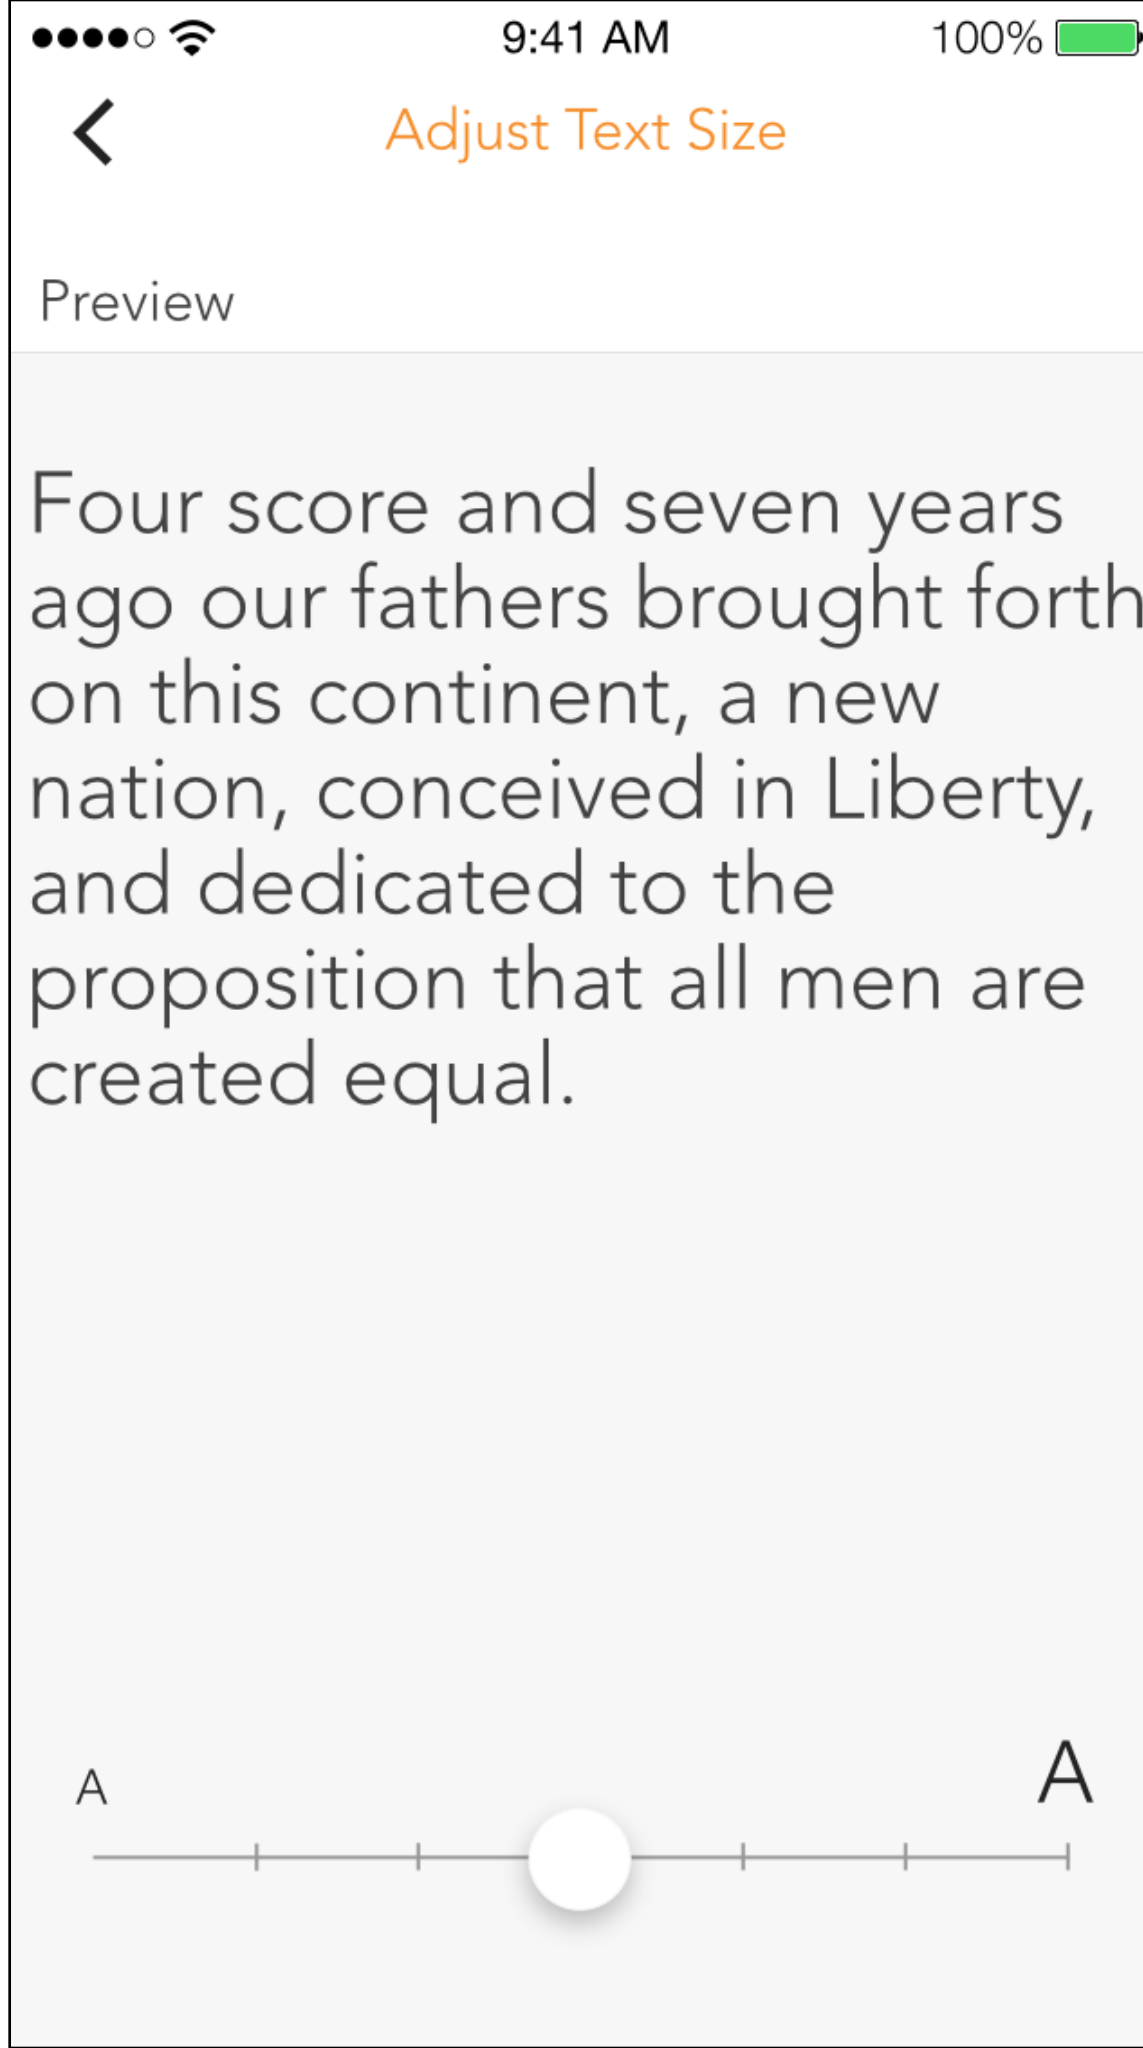

LIST ALL RECORDINGS
Pressing the Recordings button will bring up a full list of all recordings of Scripts and Notecards.

Button to take you to the associated speech on Right.

RECORDING OPTIONS
Swipe on a recording from the Right to the Left to slide the view to the right and expose Options to Share or Delete the recording.
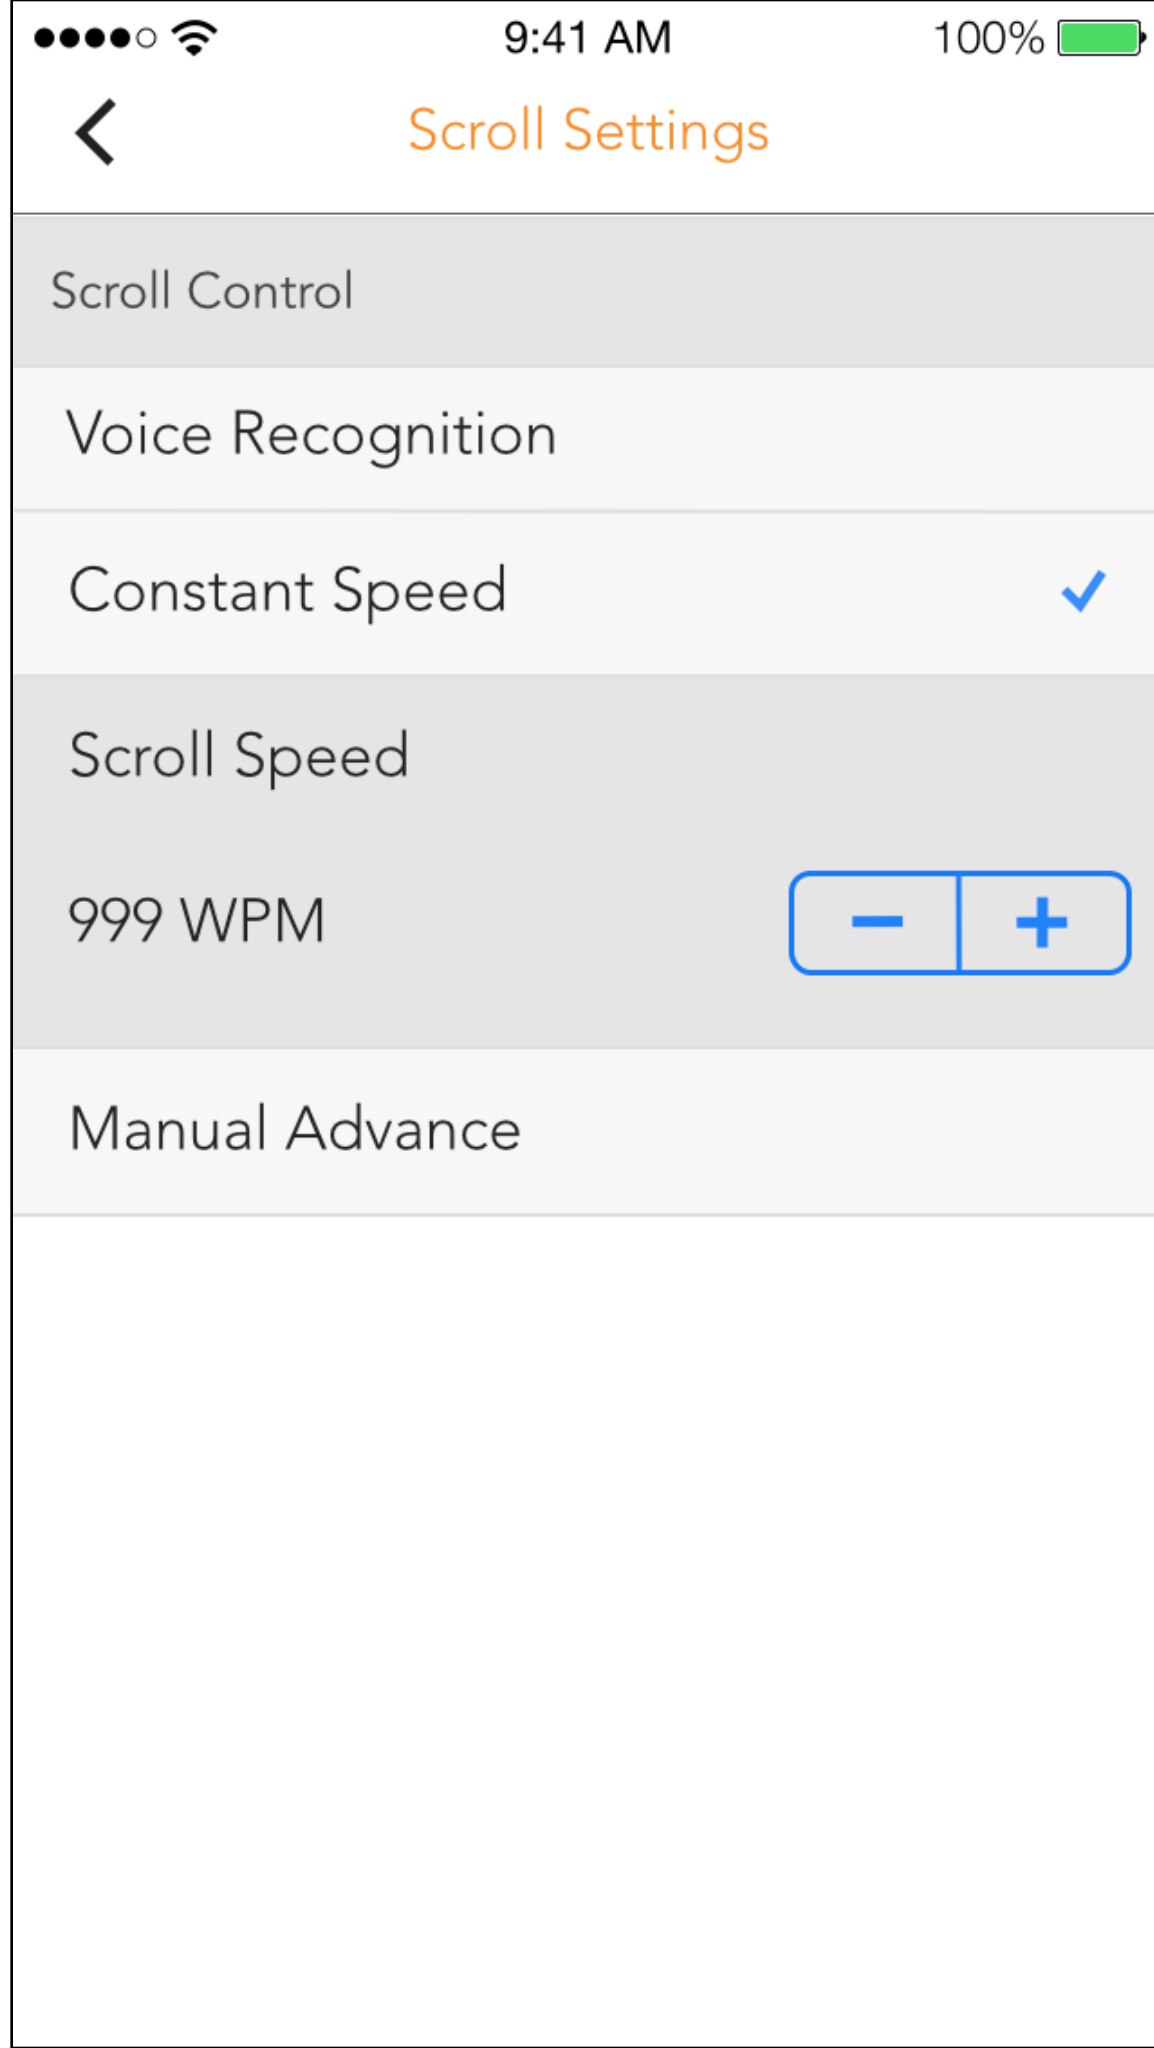

ADJUST TEXT SIZE
This view gives a preview of the text, with a slider that will increase and decrease the text size.

Scroll Control

Voice Recognition   ✓

Constant Speed

Manual Advance
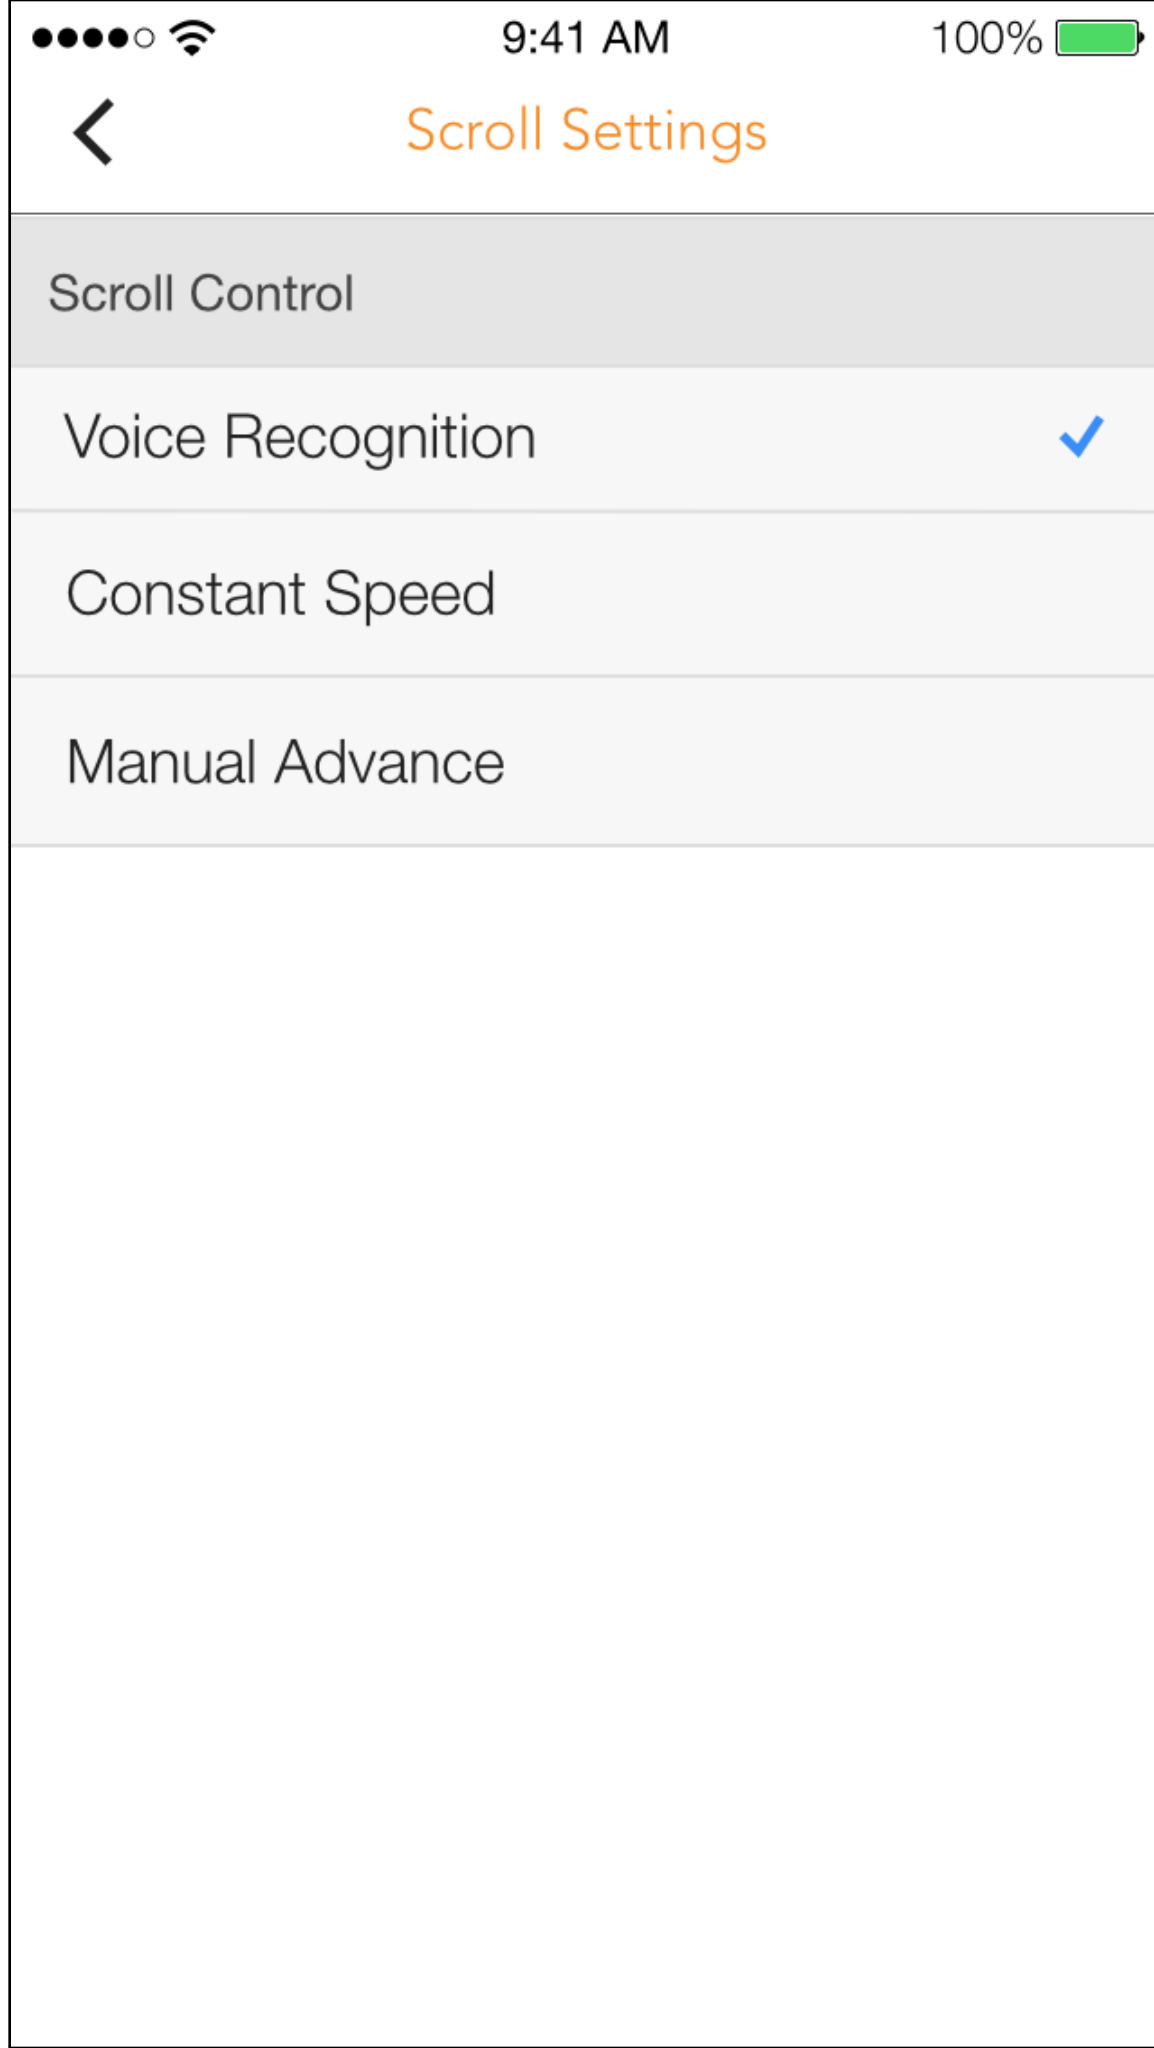

SCROLL SETTINGS
Scroll settings lets you pick one of 3 scroll styles.

SCROLL SETTINGS
Tapping on Constant Speed
allows you to manually dial in a
speed based on WPM.

DELETE SCRIPT/NOTECARD
Buttons come up from the bottom on deleting a script or notecard.

Note: This is an older view, but I'm including it, as I think we will have times where this view is needed.
